News Notes

Stake Relief Society officers entertained the officers of the executive last Friday at the home of Mrs. Louis Brandly. Thirty-five ladies enjoyed the delicious refreshments, games and the toasts given by Mrs. Georginia O'Brien and Mrs. Merkely. A unique feature of one the games was the use of 16 miniature water color paintings representing poems and other literature from the R. S. lessons. Mrs. Bryner was successful in guessing 12 correct out of 16, but was unwilling to accept the prize as she was a Stake officer. A draw between Rose Romeril and Ireta Matkin, who each had 11 correct, resulted in Mrs. Matkin winning the prize, a beautiful painting by Vilo R. Snow.

Mrs. A. Erickson, Mrs. B. F. Milner and daughter, Mrs. Archie Bennett left today for Salt Lake City to spend the winter. Mr. Erickson and Mr. Milner will follow soon.

Scavenger Ford began work last week and as a result the town presents a much cleaner appearance.

Born—To Mr. and Mrs. Geo. E. Court, a son. Dr. Munro was the attending M. D.

Quarterly Stake Conference will be held here tomorrow and Sunday. Apostles Rudger Clawson and Orson F. Whitney are expected to be present.

S. Ellis had a crew of 18 men last Monday pouring the foundations for Paul Hahl's fine new residence.

T. K. Roberts is engaged in constructing new cement approaches to the Security block.

S. B. Card purchased a new Nash Six Sedan last Monday through King Motors.

Next Wednesday is the opening day at the local School of Agriculture. More than 500 students are in sight for all provincial schools, including the British boys who will train in the north. Abont 100 students are expected here.

Ervin Harris sold a 50-acre strip of land south of Magrath to Bert Darrow for $50 per acre last week. Harris bought the land three years ags for $35 an acre.

Wm. Paris,s Chesapeake dog, "Red", while going after a duck last week during a duck hunt, had a head-on collision with a porcupine. "Red" is still "feeling poorly", and William is still pulling quills. Dr.. Munro was in attendance. Below we publish "Red's" latest photo.

"RED"

Wm. Paris now drives a new Ford sedan purchased from King Motors.

News Notes

George Rasmussen in having a new residence built on his farm. S. Ellis has the contract.

The Rev. Fred Cooke, who has been in Raymond taking up subscriptions to the Sailor Magazine and donations to the Navy League, wishes to thank the citizens of Raymond for their assistance as they have contributed about $36 to the League. The Navy League of Canada is assisting the widows and orphans of our men of the Merchant Service as they do not receive government assistance.

Don't forget the special Spud Matinee at the Rex Saturday, Oct. 30th. All the kiddies will be admitted for 3 big potatoes or 10c. Special cash prizes for the largest spuds.

Born—To Mr. and Mrs. James Still at the Community Hospital, last Sunday, a son. Dr. Astrof in attendance.

Born—To Mr. and Mrs. V. Piepgrass, at the Community hospital, last Sunday, a daughter. Dr. Astrof attended.

Lost—Twenty dollars (two fives and a ten) Saturday, Oct. 16. Reward.— Margaret Kurtz, phone 108, Raymond. n6

For the benefit of faraway subscribers who have never seen one we reproduce this cut of a sugar beet, the root of all the rush, hurry and worry around this district these days. Hundreds of tons are being dug and hauled to the factory daily. Machinery of mammoth proportions is converting the raw product into refined white sugar. Last Friday Superintendent C. R. Wing stood a treat on apples and peanuts to mark the topping of the mill's capacity by chopping 1001 tons of beets in 24 hours. This speaks volumes for the efficiency of the staff of the Canadian Sugar Factories Limited. The factory is running night and day. The company's pay roll numbers about 150 people.

Cardston News: We are sure the kids of Cardston would heartily endorse the idea of a free picture show. The story how such an entertainment for youngsters of a neighboring town was conducted was told here the other day. In this not-far-away town the merchants there announced that a free picture show would be given to all youngsters, provided each brought a mail order catalog along as a "pass." Stacks of catalogs reaching to the ceiling of the ticket room and covering a great area soon accumulated. After the show the town was lit up by an immense bonfire. The town henceforth trades at home.

GETTING THE CASH

"My father can write about ten lines of poetry and get $5," said the first boy with a superior air.

"That's nothing," said the second. "My father can draw a few lines, put some notes of music and get $15."

"Well, you'll both have to go way back and sit down," said the third. "My dad's a preacher and he can say about a dozen words and it takes four men to carry the money down the aisles."

The Evolution Of An Empire

The forthcoming Imperial Conference in London to be attended by members of the British Government and the Premiers of all the self-governing Dominions of the Empire is attracting more widespread interest than any of the preceeding Conferences of a like character, with the possible exception of the one held during the war. Some writers and public men seem to think that notable changes in the relationships now existing between Great Britain and the Dominions will result but there is little ground on which to base such belief.

Since the secession of the American colonies and the American Revolutionary War of 150 years ago, the changing relationship between Great Britain and her overseas possessions has been one of evolution, not revolution. Great changes have taken place, it is true, but the process has been so gradual and all effected so peacefully, that they were hardly noticed at the time. Perhaps the most significant change of all took place when the overseas British Dominions became members of the League of Nations on terms of equality with the Motherland and other nations.

But this gradual development of a more autonomous and independent status has in no sense resulted in any weakening of the Imperial tie nor in the solidarity of the Empire. The effect has rather been to add strength to the individual units and to the union embracing them all. The term "Empire" as applied to the British Empire is, in fact, a misnomer. Rather the phrase favored and so frequently used by His Majesty, King George V., more correctly describes what is commonly referred to as the British Empire, namely, the British Commonwealth of Free Nations.

There is nothing at all in common between the British Empire and old Roman, French, Russian, German and Austro-Hungarian Empires. The fact that these old empires have passed away while the British Commonwealth of Free Nations continues united and stronger than ever only serves to emphasize the difference.

Evolutionary, not revolutionary, tendencies are still at work throughout the British connexion, and it is to be expected that the approaching Imperial Conference will assist to clarify the atmosphere in regard to some matters. India is steadily moving forward along the path to increasing self-government, and Great Britain is not only willing but anxious to enlarge the powers of the people of India just as rapidly as the people become capable of wisely exercising those powers. The history of India will be largely a duplication of the evolution which has taken place in other parts of the Empire.

In South Africa the people appear to be somewhat concerned about the flag, and there is a considerable body of opinion in favor of a distinctive national flag for South Africa other than the Union Jack. But those who are most insistent for such an emblem nevertheless disavow any desire for or intention of a severance of the tie which binds them to Britain and the other British Dominions.

Canada is moving in the direction of appointing its own Minister to the United States with a view to having matters pertaining to Canada and the United States dealt with directly by the two countries concerned rather than through the intermediary of the British Ambassador and the Government in London. But, here again, there is not the slightest wish nor intention of severing or even weakening one tiny strand of the tie binding Canada to the Empire.

Among people in all the Overseas Dominions the view is entertained by many that the present procedure of carrying appeals from the Supreme Courts of the Dominions to the Judicial Committee of the Privy Council in London might well be abandoned, and the overseas Courts made supreme in fact as well as in name, thus saving lengthy delays and huge expense in obtaining final judicial decisions. But advocates of this change are amongst the most loyal of British subjects.

In the evolutionary process already referred to, one of the most significant changes has been in treaty making powers. Formerly, and not so many years ago, all treaties had to be negotiated and signed by the British Government, although they might have reference solely to one particular Dominion. Furthermore, all treaties made by Great Britain were binding on all the Dominions with or without their consent. Now, however, Canada makes trade treaties direct with foreign countries and they are signed in the name of the King by Canadian ministers. If Canada and the United States desire to make an agreement regarding fisheries, or some boundary matter, the two countries do so and the resultant treaty is signed by Canadian ministers.

Furthermore, the British Government no longer makes treaties with foreign countries affecting the Dominions without first consulting them and such treaties are submitted to the Canadian Parliament for their approval and adherence.

Kipling well describes present Empire relationships: "Daughter am I in my Mother's house, but mistress in my own." The British family tie holds, invisible, almost intangible, silken in texture, but strong and lasting as steel. Changing times call for other changes, in customs, methods, procedures, but the family remains intact, sympathetic, co-operative, loyal and affectionate, working for a common aim, proud of each other's achievements, united by a common bond, and joyfully yielding allegiance to one sovereign. Thus does the British Empire grow, prosper and triumph.

Woman Flies Over Mont Blanc

Wife of Lieutenant First One to Make Trip

Lieut. Theoret, who makes aerial trips daily over Mont Blanc from Geneva dropping goods and food attached to parachutes near the observatory on the summit, took as a passenger his young wife, who was the first woman to fly over Mont Blanc. Theoret prolonged the night two hours above the principal peaks of the range at the request of his wife, who was delighted with the trip. She said on her return: "It was like an aerial honeymoon."

Reds Take Possession of Wrangel

Place Fifty Russian Emigrants on Desolate Island

A dispatch to the newspaper Nichi Nichi from Hakodate, Japan, says the Russian volunteer fleet association's ship Stavropol has arrived from Wrangel Island, where it removed the British and United States flags and raised the Red banner.

Fifty Russian emigrants were placed on the island after a thorough exploration by aeroplanes. It was found that vegetation was scarce, but there were a number of fur bearing animals including bear and fox.

The area of the island was reported as 2,925 square miles.

Goodb-bye Asthma. Persons suffering from that extremely trying trouble known as asthma know what it is to long with all their hearts for escape as from a tyrant. Never do they know when an attack may come and they know that to struggle unaided is vain. With Dr. J. D. Kellogg's Asthma Remedy at hand, however, they can say good-bye to their enemy and enjoy life again. It helps at once.

The man born with a silver spoon in his mouth is the only one who doesn't have to stir himself.—Montreal Star.

For all pains—Minard's Liniment.

Turkey Erects First Statue

With Its Unveiling All Koranic Laws Pass into Oblivion

Mohammedan tradition prohibiting representations of the human form has been broken with unveiling of a statue of Mustapha Kemal Pasha, President of Turkey, and one of the outstanding figures in Near East politics.

This is the first statue ever erected in Turkey. It represents the President in European dinner jacket, bare headed and with arms akimbo.

The breaking of Koranic tradition against statues of men and women preceded the going into effect of Turkey's new civic code adopted by the National Assembly six months ago. With this code all Koranic laws passed into oblivion.

Home Not Complete Without Nerviline

When your stomach is badly upset, when you are belching gas and suffering from nausea, the quickest relief will come from 20 drops of Nerviline. Take it in sweetened water and you get an immediate result. Nerviline has been used for nearly half a century and is considered a necessity in most houses, because of its usefulness in preventing many small ills that constantly arise. Sold everywhere in 35 cent bottles.

Germany First Skyscraper

Germany's first skyscraper built on American lines is being erected at Aachen (Aix la Chapelle). It will be twelve stories high, a startling height in Germany, and will house a large motion picture theatre and a number of business offices.

CHILDHOOD AILMENTS

Can be Quickly Banished With Baby's Own Tablets

The ailments of childhood are many but nine-tenths of them are due to one cause and one cause only—a disordered condition of the stomach and bowels. To quickly banish any of the minor ailments of babyhood and childhood the bowels must be made to work regular and the stomach must be sweetened.

No other medicine for little ones has had such success as has Baby's Own Tablets. They banish constipation and indigestion; break up colds and simple fevers; correct diarrhoea and colic and promote healthful sleep by regulating the functions of the stomach and bowels. Concerning them Mrs. L. M. Brown, Walton, N.S., writes:—"I cannot speak too highly of Baby's Own Tablets as I have found them excellent for childhood ailments."

Baby's Own Tablets are sold by medicine dealers, or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Frozen milk in huge blocks is being shipped from Seattle to China and Straits Settlements. The milk is said to be fresh when thawed out upon arrival.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

Food Canned Six Years

Food that had been canned six years was opened recently by a Dutch physician, Van Leersum, and found to be still fit for human consumption, it was meat hash including onions and potatoes. The essential thing in canning, according to Dr. Van Leersum, is to be sure that all air is exhausted from the can before sealing.

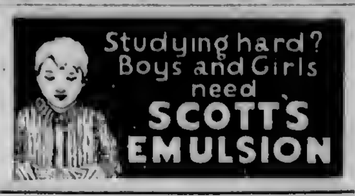
THIS MOTHER GLAD DAUGHTER IS WELL

Mrs. Parks Tells How Lydia E. Pinkham's Vegetable Compound Restored Her Daughter's Health

Toronto, Ontario.—"My daughter is 16 now and has been an invalid ever since she was six months old and has been compelled to remain out of school the greater part of the time. We have tried different kinds of medicine, but none helped her much. I had taken Lydia E. Pinkham's Vegetable Compound when I was run-down, and it had helped me so much that I thought it might help her at this time. She has gained ever since she began taking it. She attends school every day now and goes skating, and does other out-of-door sports. I recommend this medicine to any one who is run-down and nervous and weak."—Mrs. PARKS, 166 Bond Street, Toronto, Ontario.

Lydia E. Pinkham's Vegetable Compound is a dependable medicine for young women's troubles.

For sale by druggists everywhere. C



Says Canada Needs Publicity

Money Should be Spent to Advertise Resources, Opinion of British Capitalist

Sir Alfred Mond, British capitalist and internationalist, who has invested heavily in Canada, brings up a challenging message when he states that Canada's greatest need abroad is publicity. He tells of leading and supposedly well-informed British financiers who do not even know some of our greatest mines as names.

Our mineral revenues are growing each year but are still a small part of our total annual production. Dairying alone produces much more than all our mines. To bring the yearly mineral production to two, three or four times the present figures will require the investment of millions, yes, a billion dollars is needed. This money we have not at home for investment; we must get it from abroad. If Britain and Europe have the money to invest, we want to offer them the opportunity. But it must be offered. We must take it to them.

Money may well be invested by the provinces in making our mineral resources known.—Financial Post.

Salvaging Of Allied and Turkish Ships

French Allege Under-Sea Tombs Have Been Desecrated

The salvaging of allied and Turkish ships sunk during the Great War has begun with the raising of the French ship Massena.

The Italian Salvaging Company, at work, and the Turkish Government have agreed to share the profits of the undertaking on a fifty-fifty basis except for the provision that any ships or guns found in a sufficiently good condition to be repaired and used will become the sole property of the Turkish Government.

French opinion here is indignant over what it terms Turkish desecration of French under-sea tombs. The raising of the Mouve, in which 600 French sailors and officers went down to death in the battle of the Dardanelles, has provoked some bitterness on the part of the French.

The British attitude toward the raising of the English ships sunk in the Dardanelles, of which one of the most notable was the Irresistible, has not made itself felt here.

Makes Coffee Truly Delicious

A Rich, Golden, Appetizing Cup of Coffee is Appreciated

Much coffee is spoiled in the making, but it is safe to say more is spoiled in the serving. This is because comparatively few people use real cream, figuring, perhaps, that its daily use is rather a luxury. Of course, one can rob the milk bottle, by taking off the top milk, but even that is not calculated to give one the rich, golden, appetizing cup of coffee that makes this beverage truly a nectar. More and more housewives are serving Eagle Brand Condensed Milk with coffee, for the reason that it is economical and because it ensures a beautiful flavor, being so rich and creamy. There is the further advantage that it saves sugar, for condensed milk contains sugar and the milk and sugar are so perfectly blended that the proportions are absolutely right. Usually, the condensed milk is placed right on the table, being served from the can, which, if desirable, may be set in a marmalade jar.

Wouldn't Stand For It

During an election in England a candidate for parliamentary honors was addressing a meeting of Yorkshire men when he was interrupted by a man who asked: "Art 'in favor of children goin' t'school till they be sixteen?" "Certainly I am," said the speaker. "Well, I'm not," was the emphatic answer. "I'm noono goin' to 'ave my lad coomin' whoam fro' t'school an' axin' me for money for a shave."

Feet sore?—Minard's Liniment.

Another Zeppelin Ready

Another Zeppelin, the Z127, is almost ready for the Spanish-Argentine service. It is of 105,000 cubic metres volume, 250 metres long, 31 broad, is able to carry fifteen tons, and is driven by seven motors of 2,940 horse power.

Bollo—"What do you do when you see a beautiful—an extremely beautiful girl?"

Peggy—"Oh, I look a while, and then I get tired and lay the mirror down."

Minard's Liniment for chapped hands.

Blames Radio For Hurricane

Atmospheric Tension Said to Cause Excitement In Cloud Masses

The fast multiplying activities of radio broadcasting stations were directly responsible for both the Florida and Vera Cruz hurricanes, according to Joaquin Gallo director of Tacubaya observatory.

Gallo's theory, is that the constant emission of short wave length electrical charges into the ether by the activity of the thousands of radio stations built up an atmospheric tension, excited the cloud masses and put them into a condition to precipitate immense quantities of water, accompanied by severe wind and electrical storms.

The director is now engaged in experiments with a view to backing up his theory with convincing scientific data on the subject.

Giant Plane Tried Out

Germany Marking Series of Test Flights With Super Machine

A new Junkers double decked superplane with a surface measurement of 109 square yards is being tried out in Germany in a series of test flights.

The body of this giant plane is nine feet ten inches wide and comprises two platforms with a cabin spacious enough for 20 beds as well as for heavy baggage. Adjoining there is a special freight compartment for the shipment of express and freight, the absence of which hitherto has been found a vital shortcoming in international air service.

Another innovation is an auxiliary engine room with a separate motor for lighting, for the accelerated filling of tanks, wireless and other services.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worn infant.

Ancient Town in Germany

In Germany there has been discovered in the Federsee marshes of Upper Swabia a town that was fortified and inhabited in 1,000 B.C. The town was palisaded with pine trees, 50,000 trunks having been found. Other evidences of civilisation also were found.

The Oil for the Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

Hardware Clerk—Sir, I'd like to have my salary raised. Boss—Well, don't worry. I've managed to raise it every week so far, haven't I?

Scientists declare that a colorblind woman is a great rarity.

The ease with which corns and warts can be removed by Holloway's Corn Remover is its strongest recommendation. It seldom fails.

Every singer in a quartet can point out three good reasons why the organization isn't absolutely perfect.

Western Grain For Royal Winter Fair

Saskatchewan Department of Agriculture Offers Prize for Sweepstakes

Mr. M. P. Tullis, Field Crops Commissioner for Saskatchewan, is arranging with grain growers of the province for exhibits at the Royal Winter Fair, Toronto, and the International at Chicago. It is expected that two, who have previously won championships, will again compete. However, there are several new names on the list with excellent samples. The Department of Agriculture will pay transportation charges from Regina to Chicago or Toronto and return, and will look after the exhibits without further trouble to the grower. The Department will also award $150 to any Saskatchewan exhibitor winning a sweepstakes, and $50 for first prize, while the Canadian Pacific Railway Company offers $100 to the Canadian obtaining the highest placing in hard wheat.

Rates Ae Prohibitive

Canadian cattle exporters are not the only objectors to Atlantic shipping rates. The Scottish Farmer says; "Atlantic rates are almost prohibitive for Clydesdales fillies. You can't ship for Clydesdale fillies. You can't ship a £50 filly at a £12 rate. No general trade is possible at present North Atlantic transport rates."

"So you and Harry aren't going to get married this month?"

"No, not for a while, I guess. You see, he paid a year's dues to the bachelor's club, in advance."

One trouble about knowing too much is that you waste a lot of valuable time trying to explain things so that others can understand them.

New Volume Is Written Describing The Wonders And Beauties Of Canadian Scenery

Can you imagine a span of a thousand million years or so? If you can, try to picture to yourself the place where the Rocky Mountains now stand, with their snow-crowned peaks towering into the sky, at the bottommost depths of an inland sea.

Do you know how the Rockies were formed? By what Titanic forces these great masses were crumbled and folded and lifted high in the air?

It is a most interesting story that geology tells us concerning the formation of this gigantic range through the ages aeons before the human race dwelt upon the earth, and only one of the many other fascinating things that one learns about one's own land, in "Picturesque America," a de luxe volume, superbly illustrated with 500 photographs and charmingly written, which has been published recently by "The Resorts and Playgrounds of America," New York.

It is a compliment, and not one undeserved, to Canada, that this book, which describes so clearly and well, the wonders and beauties of the parks and beauty spots of North America, should give over more than one-quarter of its space to Canada's great playground. Yet it cannot but be recognized that her parks are unique in their magnificence of form and beauty of color, in their preservation of game and wild creatures, and in their possession of great virginal forests and vast regions as yet unexplored.

The National Parks of Canada are 11 in number and range in area from a few square miles to 4,000 square miles. For the most part they are found in the western part of the country; while the three most beautiful Rocky Mountain parks, Banff, Yoho and Glacier, lie along the main line of the Canadian Pacific Railway.

Many well-known writers, such as Robert Sterling Yard, Zane Grey, Mary Roberts Rinehart, Henry Van Dyke, Charles Lummis, Arthur Springer, Mary Carolyn Davies, and J. B. Harkin have contributed to this volume, which maintains a high standard of literary quality throughout. Verses of nature by equally well known poets are scattered throughout, and there is added a complete index and bibliography. Hence besides the charm of the book it is invaluable as one of reference. It would seem that its purpose—to make better known and thus better appreciated the scenic marvels of America's wonderlands, must be accomplished.

Dakota Settler Likes Saskatchewan

Says Any Farmer Who Wants to Work Can Make Money in the West

Mr. W. J. Hope gives the following statement of his experience as a settler in Saskatchewan to the Canadian Government Agent at Grand Forks, N.D. "I take great pleasure in telling you what I think of the Canadian Northwest. I purchased three quarters of land in 1921 in the Wood Mountain country, southwest of Moose Jaw. There were 150 acres broken on the farm. In 1922 I operated the farm myself and produced 4,000 bushels of wheat, built a fence around half a section, also a granary, garage and shack.

"In 1923 I rented the farm, and broke 12 acres. In 1924 I broke 25 acres. In 1926 I built a barn with a hay loft 28 by 32, also a storey-and-a-half house, 18 by 22, with full basement, and kitchen 18 by 14. The house is plastered and back-plastered, stained and varnished inside. All buildings are well painted. I also bought one more quarter section.

"This farm has produced enough to pay for all buildings and still have $2,360 net profit in addition to paying for the farm itself.

"I claim this country is the garden of Saskatchewan. Any farmer who wants to work can make money in this country."

Complete Test Flight

Two superplanes have just completed a test flight from Berlin to Peking and back, for the purpose of establishing a basis for a regular air service to the far east. The aviator's return was witnessed by Traffic Minister Krohne and other government representatives, the Russian ambassador, the Chinese and Lithuanian ministers, and Sven Hedin, the explorer.

Clifford: "It's a pretty good looking banjo, but $15 seems high. Is it in good condition?"

Harold: "Why's it's in the plink of condition."

Berry picking has been made easy by a patented device, resembling a flour scoop, the bottom composed of wire teeth.

W. N. U. 1650

Starts Campaign For Contracts

Saskatchewan Live Stock Pool Getting Down to Business

The Saskatchewan Live Stock Pool has started a province-wide campaign for contracts and it is hoped the objective of 1,000 car loads of live stock on contract will be reached by January 1st, 1927, when the pool is expected to commence operation. The pool is just half way to this objective now, with 500 car loads under contract.

When the objective has been attained arrangements will be made immediately for the election of five delegates in each of the seven districts into which the province will be divided for the purposes of the pool and for the election of a permanent board of directors.

An advisory committee consisting of the Hog Pool, and J. G. Robertson, C. H. Williams, Semans, representing the Saskatchewan Swine Breeders' Association, has been appointed to the pool.

Thirty-five locals are now under formation. Some of these are well signed up, and some have only the membership secured at the organization meetings held just prior to harvest. The Live Stock Pool differs from the Wheat Pool in that it is necessary to have an intensive sign-up at each shipping point to give the most efficient service. A membership with less than 50 per cent sign up of the stock growers will mean that the local will be working under a handicap. Regular shipments will be difficult, and it will not be possible to give members the service they would receive with 100 per cent membership in the district.

Synthetic Sunshine

Obtaining Food From the Light of the Sun and Nitrogen of the Air

The world need never go hungry as long the the sun shines. So the chemists have declared at the Institute of Politics, at Williamstown, Massachusetts; and since scientists say so it must be so.

Food in the future, it appears, is to be obtained from the light of the sun and the nitrogen of the air. Proteins and carbohydrates those elements of nutrition which you hardly can escape getting in a good dinner whether you like them or not will probably be made in the factory rather than raised on the farm. "Thirty men in a factory the size of a city block can produce in the form of yeast as much food value as 1,000 men working on 75,000 acres under ordinary agricultural conditions." These words of good cheer come from the same wise men who recently promised to do away with wars over fuel oil fields by methods of extracting petroleum from coal shale. What the 970 superseded farmers would be doing, and whether they would like their food in the form of yeast when they got it, were questions left to other prophets.

All the rest of us have to do, it seems, is to trust to the chemists. We all like, at times, to imagine to ourselves the happy life of South Sea Islanders, lying under trees in the sun and allowing ripe breadfruit and bananas to drop into their laps. But in these less kindly northern latitudes, where the sun sometimes fails to shine and occasionally it rains, no such easy solution of the problem of living is in sight.—From the Outlook, N.Y.

Sardines Leave Home Waters

Cold Currents Along French Coast Found to be Responsible

The French marine research vessel La Tanche has just found out why sardines leave home.

The problem has been bothering French fishermen and sardine packers for several years, for the canneries have been threatened with closing down because the tiny fish no longer move in great schools along the French coast.

The research workers found that cold currents have come into the once rich sardine fields and have driven them farther out to sea, where the French fishing fleet, at greater risk, is now hauling them in by netfulls.

Population Increase

An average increase of nearly five per cent in the population of twenty federal electoral districts in Manitoba, Saskatchewan, and Alberta, as compared with 1921 figures, is shown by the quinquennial census of the three prairie provinces, taken as on June 1, 1926. The total population of these twenty electoral districts is given as 803,826, contrasted with 735,308 in 1921. This announcement is made in a preliminary statement of population recently issued by the Dominion Bureau of Statistics.

World Wheat Shortage

All Factors Seem to Point to a Keen Demand This Year

Wheat production on Mother Earth in 1926 is 25,000,000 bushels less than the previous year, according to an official estimate issued by the bureau of statistics. This is the case notwithstanding an increase in production on this continent of nearly 40,000,000 bushels.

Taking the production in all countries other than Canada and the United States—the crop this year will be 61,000,000 bushels less than in 1925.

In North America, while Canada expects a smaller crop, the United States will increase their yield by more than 100,000,000 bushels. All factors seem to point to a keen demand of wheat, according to the report, which reads:

"India is not expected to be able to spare any appreciable quantity of wheat for export and the situation as regards Russia is very uncertain. Last year it was forecast officially that the exports of wheat from the soviet republic might exceed 110,000,000 bushels, but from July 1 to December 31, 1925, they were actually only 14,000,000 bushels.

"The wheat crop in France is reported considerably below that of 1925 the bulletin includes. The general outlook appears therefore to be for a strong demand for the Canadian crop."

Says Canada Needs National Viewpoint

President of Canadian Press Gives Address in Toronto

Canada needs to think nationally to increase sympathy and unselfish thoughts as between the East and West and to see that there grows up an increased sympathy and knowledge between the two great races of whom the country is composed, said J. H. Woods, president of the Canadian Press, and managing director of The Calgary Herald, in addressing the Canadian Club.

Mr. Woods spoke on the subject of "Canada," which, he said, had stood for more than 200 years as the "land of the open trail."

Tracing the story of the explorer, the path-finder, the pioneer and early settler in Canada, Mr. Woods pointed out that Canada had accomplished much. Her legislative system had come to be regarded as a model among the peoples of the world, Canada had shown the world how two great nations could live side by side in harmony and yet maintain in that relationship independence and self-respect.

Busiest Spot in the World

The busiest section of sidewalk in the world is just south of Madison street on State street in Chicago, according to a survey just completed by the Association of Commerce. The survey says that by actual count 40,000 persons walk over this section of pavement every hour during the rush hours on week days. The walk is only 20 feet wide from the building line to the curb.

Children's clothing may be made practically fireproof if soaked for a few moments in a solution of ammonium phosphate.

Only a small per cent of the money saved up for rainy days is invested in umbrellas.

Dusting vs. Spraying The Potato

Report of Experiment Undertaken at Fredericton, N.B.

The report for 1925 of the Dominion botanist is particularly worthy of study and cogitation by every agriculturist and grower of any sort of produce. It is a report of rare comprehensiveness, covering records of investigation and remedial experiments of practically every disease conducted by pathological experts connected with the Dominion Experimental Farm System. Mr. D. M. J. MacLeod, plant pathologist, in charge at Fredericton, N.B., deals largely with diseases affecting the potato. Among other things he tells of a valuable experiment carried out to test the relative efficiency of various dusts as compared with spray mixtures, about which there is considerable diversity of opinion.

A field of four and three-quarters was divided into three plants of equal area. The land was of average fertility and apparently uniform throughout. Certified Green Mountain potatoes were experimented with. Liquid Bordeaux was applied by means of a power sprayer with a four-row twelve-nozzle boom and Bordeaux dust and copper carbonate dust by means of a Niagara traction crop duster provided with a drag canvas. Efforts were made to apply the dust and spray mixtures—the composition and application of which are given in tabular form in the report, which is to be had free on addressing the Publications Branch, Ottawa—in such quantities that equal amounts of metallic copper would be used.

While the results are not considered conclusive, the experiment having been conducted for only one year, a table published shows that better yields followed the Bordeaux dust than the spray as applied with power machines against such diseases as early and late blight.

Won Many Prizes

Nineteen First Class Prizes for Creamery Butter Won by Alberta at Toronto Exhibition

At the Canadian National Exhibition held recently in Toronto, thirteen exhibitors of creamery butter from the province of Alberta were awarded 19 first prizes, six second prizes and eight third prizes. In addition the silver cup for the highest scoring butter on exhibition was awarded to the Woodland Dairy Ltd., of Edmonton, on a score of 98.7 per cent out of a possible 100 points, and further, in the class for the highest average score of exhibits in the various classes the second and third prizes were awarded to the Central Creameries Ltd., Calgary, and Mr. C. E. Christensen, of the Edmonton Pure Butter Co., Edmonton.

India Has Praying Plant

Sir Jagadis Bose, a Hindu plant specialist, tells of a "praying plant" that each evening prostrates itself about the hour that the temple bells calls the people to prayer. The plant is like a tree and twice the height of a man, it is said.

Wife—"I wish, dear, you would discuss with me some of the things we need for the house."

Husband—"All right, what are they?"

Wife "Well, to begin with, we ought to have a new dress."—Christian Science Monitor.

Discovery Is Made That Rust Spores Are Spread By Winds Over Great Distances

It is not altogether comforting to know that rust spores can be carried from great distances and are to be found at very considerable heights. However details of spore-trapping experiments co-operatively conducted by the Royal Canadian Air Force and the Dominion Rust Research Laboratory at Manitoba Agricultural College given by Dr. D. L. Bailey, pathologist in charge, in the Dominion Botanist's report for 1925 are beyond measure interesting. The idea of the investigation or experiment was to collect all data possible regarding the origin and spread of black stem rust in Western Canada by studying the spore-content of the upper air over various districts during the season.

As the report suggests, the results obtained by the first year's work of this kind are striking. In the first instance the wind dissemination of rust spores over large areas and for considerable distances has been established. Over heavily wooded areas widely separated from cereal growing districts indications were definitely obtained that even at an altitude of 5,000 feet the concentration of spores was surprisingly high. And this upwards of three hundred miles from the nearest wheat growing region. This, says Dr. Bailey, accounts in large measure for the almost miraculously sudden appearance of rust over large areas. Because once rust becomes prevalent in the spring wheat area of the United States the rust spores can very rapidly be carried north in large numbers by a south wind.

An Important Industry

Export of Flower Seeds from B.C. is Rapidly Increasing

The culture of tulips promises to become an increasing industry in British Columbia. The activity thus far has been confined to Vancouver Island, where it has been conducted successfully at Saanichton, Sidney, Coppie Hill, Duncan, Royal Oak, Victoria and other points. It is now likely to be extended to the mainland.

"The production of flower seeds has become an important industry in this province. Every year a greater quantity of seed is shipped from British Columbia, and England in particular is coming to depend to a greater extent on the warm climate and rich soil of Vancouver Island for its supply of seeds. Millions of flowers blossoming all over England have generated from seeds produced in Canada.

The commercial production of sweet-pea seed in particular has made great strides in the last few years, and a considerable trade has developed with seed houses in England. Sweet peas grown on Vancouver Island by an English gardener reached such perfection that he sent a sample to the old country. In response came an immediate order for half a ton of seed.

Exports of Canadian seed of all kinds in the last three fiscal years have been respectively worth $8,547,712, $10,211,497 and $16,792,105."

Filming Clouds

American Moving Picture Concern Goes Abroad to Get Cloud Effects

The resources of the canning industry in the States is well known, but a new phase commences when the cinema people decided to "can clouds." Hollywood is an ideal place for film-making, owing to the clear air and bright sunshine, but there are pictures which need cloud scenes, and to complete them it is often necessary for the photographer to go far afield for his effects, what time the release of the film is delayed. To overcome this defect, and to have a reserve of "clouds," the Metro-Goldwyn-Mayer company have decided to have a man specially engaged in "shooting" cloud scenes, and the celluloid records will be kept, in their familiar tins, at the headquarters of the firm for use as, and when, required.—London Chronicle.

Increase in Wheat Production

Agriculture embraces one-third of the national wealth of Canada, according to E. S. Archibald, director of the Canadian Government Experimental Farms. "It is quite possible," he said "that, with no more acreage than the present 22 millions under wheat cultivation in Canada, an increase of ten bushels per acre in production, may be secured."

Helen: I fear I have made a mistake.

Ruth: Why?

Helen: He proposed in a taxicab. The minute I accepted he paid the fare and we got out and walked.

Getting Rid Of Weeds

Publicly Rewarding Farmer Who Keeps His Land Clean

Recently a party of Eastern business men out on a trip observed the weeds in the crops and along the road sides and wrote letters to the newspapers about the careless farmers who were allowing their land to be overrun by weeds, making them unprofitable to themselves and a menace to their neighbors.

Not very long ago the business men of Swift Current noticed with concern that the farms in the district were becoming badly infested with weeds. Instead of scolding the farmers they put their heads together, raised a substantial sum of money among themselves, offered a prize to the farmer in the district who had the cleanest farm and presented him with a cup at a banquet held in his honor.

Which method will produce the best results? It is hardly necessary to say that the Kiwanis Club of Swift Current has done the right thing in the right way. The farmer who keeps his farm clean and grows only clean crops deserve the applause of his fellow-citizens. The farmer with a dirty farm is not always to blame. He may have just bought the land, he may not have sufficient help to work it properly, it may be so badly infested with different weeds, all requiring different methods of eradication, that he may hardly know where to begin, but he is not as good a farmer or as good a citizen as the man who regards weeds in his crop as a standing reproach against his own reputation and the honor of his farm. And the business man who scolds the farmers for not getting rid of weeds is not as good a business man or as good a citizen as the one who puts his hand in his pocket and co-operates with others in publicly rewarding the farmer who goes to the most trouble to keep his farm clean.—Saskatchewan Farmer.

How Plaster Of Paris Received Its Name

French Capital Built Over Beds Where It Is Obtained

Plaster of Paris is derived from a mineral called gypsum. Burned just to dry off the superfluous water, this gypsum yields a fine chalky powder which, when moistened again into a paste, and pressed into a mould, hardens into a perfect replica of its model, so making an ideal material for cheap statues and the like.

Gypsum is found in many parts of the world, but as a large part of Paris happens to be built over whole beds of it, that city was the first to discover this particular way of using it. Hence models and statuettes so fashioned were spoken of as being made of the plaster of Paris.

A Siamese kitten was recently rescued by the steamship President Garfield from a hatch cover floating in mid-ocean.

He: "Dearest, am I the first man that ever held you in his arms?"

She: "Yes, of course. Why do you men always ask the same question?"

Blemishes and Irritations Quickly Disappear

When Cuticura is used. Bathe with the Soap and hot water, dry gently and anoint with the Ointment. This treatment not only soothes and heals unsightly and annoying pimples, rashes and skin irritations but tends to prevent such conditions.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.
Cuticura Shaving Stick 25c.

WORLD HAPPENINGS BRIEFLY TOLD

Professor F. Alexander Guthler, 50, president of the University of Jena, Germany, committed suicide. No reason is assigned for his act.

Britain is now exporting motor cars to the Dominions at the rate of 21,000 a year. In 1923 the number of cars exported was only 5,000.

The condition of foreign missionaries in China is becoming increasingly precarious. Ill feeling toward missionaries has been reported recently from widely separated cities.

Seven hundred and seventy-eight women shoplifters have been caught in the last five years by Miss Gertrude Hunter, a detective employed in one of London's largest department stores.

After cruising three days with a pirate crew, the Chinese steamer Hsin Fung arrived at Hong-Kong, the pirates having fled on the approach of aeroplanes.

Brazilian citizens regardless of position or rank, are forbidden by a new constitutional amendment to accept foreign decorations. Citizens accepting such honors will lose their citizenship.

It's Sir Alan Cobham now. The man who culminated a series of daring long distance flights with a 28,000 mile jaunt to Australia and return, has been made a knight commander of the British Empire by the King.

In a contest recently between a motor cyclist and an express train, covering a distance of 500 miles between Sydney and Brisbane, the motor cyclist won, reaching his destination 30 minutes before the express.

Allan Brooks, Vancouver, B.C., artist-naturalist, has been awarded a gold medal by the Canadian National exhibition for his work in the Wallace-Havelock Robb collection of bird paintings, shown in the natural history section of the exhibition.

Frank "Tex" McLeod, 41, well known as a rider and roper at western rodeos in the United States and Canada, was killed near Bynum, Mont., when his automobile overturned. He had driven but a few times and apparently lost control of the car. He was alone at the time.

The skull of a native of South Africa, who died a short time ago was found to measure 8½ inches in length with a capacity of 122 cubic inches. The discovery of this huge skull at the present day is believed to strengthen the theory that Africa was the cradle of the human race.

The maximum recorded temperature "in the shade" is 131 degrees Fahrenheit, observed at Greenland Ranch, Cal.

Duke Charmed With Rockies

The beauties and charm of the Canadian Pacific Rockies have registered strongly upon the tourist, the trail rider and the mountain climber and of the many expressions of appreciation received at the tourist department of the Canadian Pacific Railway, the following was received from Duke Dimitri of Leuchtenberg, Count de Beauharnois, who journeyed with the Trail Riders of the Canadian Rockies during their recent annual ride from Lake Louise. From Banff he writes:

"I am terribly sorry that this wonderful summer is coming to an end. This country is certainly one of the most beautiful and wildest I have ever been in. Lake Louise is really an ideal spot. I shall have about 3,000 feet of film of the prettiest spots of the region surrounding Banff and Lake Louise. We are about to start out for Mt. Assiniboine where from we shall go to the Yoho Valley."

The Duke is a lineal descendant of Charles, Marquis de Beauharnois, who governed Canada in the name of the French King Louis XV, between 1726 and 1747. He travelled from Cherbourg on the C.P. liner Melita, meeting his cousin the Marquis D'Albizzi to take part in the 34-day ride of the Trail Riders.

Bordered Materials are Smart Features of The New Mode

The mode for bordered fabrics finds expression in this simply designed one-piece frock of kasha flannel. The new wide belt favors double buckles for fastening, and is worn at the top of the hips. The convertible collar is fashioned of the border, as is also the tiny vestee, pocket and narrow cuffs, to which are gathered full sleeves. No. 1301 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 2½ yards 54-inch bordered material; or 3¾ yards 39-inch if made of plain material. 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

VICKS VAPORUB

Has Never Accepted Salary

Checks Sent to Governor of Massachusetts Are Not Cashed

Governor Alvan T. Fuller has not accepted his salary from the State of Massachusetts for the past six years, allowing $33,500 to go back into the general funds of the Commonwealth. As Congressman he did not take salary from the United States; as lieutenant-governor for four years he did not take the salary of $4,000 a year, and so far he has not collected the $17,500 which he has earned as governor at the rate of $10,000 a year.

A salary check sent him each month from the state treasurer's office has never been cashed. At the end of a year, all unpaid checks are outlawed and the banks instructed not to cash them.

Capt. Bernier To Go North Again

Canadian Explorer Looking Forward To New Ventures in Hudson's Bay

Captain Bernier, hero of many exploits in the Arctic, said, in regard to the recent action of the Russians in seizing Wrangell Island: "We had no right there in the first place. Personally, I have never approved of the action. Ever since I was a boy I remembered the island colored in yellow on the map, the color of Siberia." The explorer is looking forward to a new venture next year out of Hudson's Bay.

New Discovery Kills Catarrh Germ Gives Quick Relief

Nasal catarrh, clogged nostrils, obstinate and annoying head colds, dull headaches, buzzing head noises no matter how bad, now yield almost instantly to the amazing power of Geero Wormwood Balm. A delightful, clean and pleasant liquid treatment, positively harmless to the most delicate tissues, but powerful enough to break up congestion, allay inflammation and kill germs within a few minutes. Your throat and nasal passages are cleared like magic, you breathe freely and easily as nature intended and your dull old head feels clear and clean.

To prove that this is absolutely true and to quickly introduce the treatment to thousands of catarrh sufferers who need it—all druggists are now authorized to supply Geero Wormwood Balm on a strict guarantee of swift and full satisfaction or money back! No matter how many treatments you have used without success if you really want to be freed from catarrh, don't miss this opportunity to try Geero Wormwood Balm without slightest risk of cost unless pleased with results. A 60c box will last for weeks.

The best doctors in the world are Doctor Diet, Doctor Quiet, and Doctor Merryman.—Jonathan Swift.

A device that can be attached to any telephone, permitting the use of both hands, is on the market.

The grass-green emerald is found in an almost inaccessible locality in the Salzberg Alps.

Immigration And Balanced Production

By C. W. Peterson

Every now and then objections are raised to policies having for their object an increase in Canada's population, on the grounds that we have not yet completely solved our industrial unemployment problem and, therefore, should not add to our present difficulties. Such objections are based on a complete misapprehension. They would undoubtedly be valid in fully developed, overpopulated countries, but that line of reasoning cannot consistently be applied to a new country like Canada. One family placed on a farm will create employment for from one to two additional families in our towns through its own consumption of commodities, machinery and the like and through producing the raw material of urban industry.

The recent European war and its aftermath brought home to the world a multitude of strange economic facts, many of them as old as the hills, but up to that time wholly unrecognized. One of the outstanding lessons taught mankind was that there is absolutely no limit to the amount of work to be done in this world, or to the amount of business to be developed. The truth is that over-production is inconceivable. The purchasing power of every country lies in its own power of production and the more each country produces, the greater may be its trade with other countries, and the more they all produce together, the greater the variety of comforts and necessities available for the world's population. We have not even approached within measurable distance of satisfying reasonable human wants leave alone ever supplying them.

What Canada, and many other countries, has suffered from during recent years, and what has given rise to general unemployment, is not over-production, but unbalanced production. While Canada's population has been unequally distributed, our aggregate working force has been, and still is, vastly below our minimum national requirements. With millions of acres of the world's richest agricultural lands lying idle and undeveloped, and the world clamoring for food, it is paradoxical to harbor an unemployment problem. Widespread unemployment under such conditions is prima facie evidence of bankrupt statesmanship in so far as sufficient intelligence and energy has not been focussed on the solution of a problem which obviously lends itself to correction by well known and proven methods, namely, the augmentation of our productive, agricultural population, which would speedily find full time employment for our industrial plant.

England's King Never Dies

The King of England never dies. The moment a sovereign passes away, his title, dignity and powers automatically are transferred to the heir apparent, who thereupon becomes "of age" even though he may not have reached his majority.

A French scientist claims that a motor fuel, similar to gasoline, can be made from vegetable oils.

From Scotland's Best Experimental Farm

This is one of 23 magnificent Clydesdale stallions which arrived recently on the Anchor-Donaldson freighter Carmia at Montreal. They were none the worse for their long sea voyage from Glasgow, but were enthusiastic over getting ashore again. This shipment of pure-bred horses was brought over by Q. C. Pitt, of Richlea, Saskatchewan, where they are now exploring their new Prairie home.

MOSES HONORED IN HIS DEATH

Golden Text: Precious in the sight of Jehovah is the death of his saints. Psalm 116.15.

Lesson: Deuteronomy 32.45-52; 34. 5-8.

Devotional Reading, Psalm 116.12-19.

Explanations and Comments

1. Moses Exhorts the People To Observe the Law, 32.45-47. The work of Moses was over. He earnestly charged the people to remember all the words of the law which he had given them and to command their children to keep the law.

"The natural and the appointed place for children to make the acquaintance of God is their own home. The most powerful and persuasive lips for declaring the awful sanctities of religion are the priestly lips of ordained parents. I would prefer the early guidance of the illumined father and mother to the instruction of all the state teachers and official priests in Christendom."—(Dr. J. H. Jowett).

"For it is not a vain thing for you; because it is your life": in these words Moses reminded them how very important were the laws which they must observe—they were not trifles, but matters of life and death. "Through this thing ye shall prolong your days in the land, whither ye go over the Jordan to possess it."

If thou wouldest enter into life, keep the commandments" (Jesus).

Tay Pay O'Connor

Rt. Hon. T. P. O'Connor is 78 Years of Age

Rt. Hon. Thomas Power ("Tay Pay") O'Connor, M.P., editor of T.P.'s and Cassell's Weekly, and censor of films, celebrated his 78th birthday recently.

Probably nobody of his age turns out so many newspaper columns as does this noted newspaper writer and statesman. His powers of writing reminiscences are prodigious. He is known by everybody among the famous ones of the world and by not a few of the infamous ones.

As "father" of the house of commons he was entertained by all parties in parliament at a luncheon on his 78th birthday. He was made a privy councillor in 1924. He became censor of films in 1917.

From His Viewpoint

The small boy had always been afraid of dogs. One day, after a long struggle to get him to pass a large dog, his mother scolded him for his timidity. "You'll be afraid of dogs, too," was his justification, "if you were as low down as I am."

The Bureau of Mines predicts a field of usefulness for slate waste as an asphalt filler instead of cement or limestone.

Why put off that visit to Europe, when it can be made so economically, NOW, by travelling Third Class, Cunard or Anchor-Donaldson Service.

You travel in perfect comfort. Cabins are roomy and well-ventilated. Public rooms and smoking rooms are handsomely appointed. Spacious decks invite you to stroll in the bracing sea air. Menus present a wide variety of wholesome foods.

England, Scotland, and the Continent are delightful in the early Fall. Make your reservations now.

Huge Fortune For Ex-Kaiser

Receives $250,000,000 for Quit Claim Against Germany

A complete settlement has been made between a representative of the Prussian state and the Hohenzollern family, according to Leipzig newspapers, whereby the former kaiser, crown prince and their families are to get 1,000,000,000 gold marks (about $250,000,000 for a quit claim against Germany.

Before the war the former kaiser's fortune was estimated at $100,000,000, whereas, according to reports, he is to get $250,000,000.

In addition, it is estimated the ex-kaiser has relinquished his claim on many castles.

John Bull Summons Another Meeting Of His "Board Of Directors"

London.—All eyes lead to England now for the Imperial Conference, that great cabinet of the British Empire which will meet in the historic cabinet room at No. 10 Downing street on October 19. Prime ministers, maharajahs, delegates from the overseas Dominions and representatives of the crown colonies are converging on London, the hub which unites the spokes of the British Empire.

It has been three years since John Bull called a meeting of his "board of directors," and many questions have arisen to crowd the agenda. There are the usual problems of imperial growth—trade, immigration, defense and communication—but these will be dominated this year by a question which goes to the very roots of inter-empire relations.

The big question is the treaty-making status of the Dominions in foreign affairs. The pact of Locarno, which made Great Britain the policeman of the Rhine, marked a new departure in British diplomacy. For the first time in history England has been explicitly separated from her Dominions by a treaty.

Probably the next question of importance will be the discussion of the individual status of the Dominions. General Hertzog, the fiery South African premier in a speech delivered last May, urged South Africa's claims of a sovereign status and demanded that Great Britain join in declaring dominion independence for the Union of South Africa.

It has been hinted about, however, that since his arrival in London, General Hertzog's views have been somewhat modified, and only the conference itself will develop his exact attitude.

Crowned Cauliflower King

Manitoba Gardener Captures Prize At Show Held In Cleveland

Ottawa. At the American Vegetable Growers' Association annual show, held at Cleveland, Ohio, Klaas De Jong, a market gardener of East Kildonan, Man., six miles north of Winnipeg, was crowned cauliflower king of North America.

In competition with entries from 11 states, Mr. De Jong carried off the championship prize for the 12 head of cauliflower that he exhibited because of their superiority in size, weight, uniformity of shape and general appearance. Each of the dozen cauliflowers measured 14 inches in diameter.

Grape Growing In Alberta

Lethbridge, Alta.—Growing grapes on the prairies is no longer an experiment.

In the Raymond, Alta., district at least two test plots have produced delicious concord grapes for several years now, and the Hutterite colony, south of the city, has gathered from the vines, 17 large baskets of fruit.

Next summer another large plot will be set out. The grapes were originally brought from South Dakota.

Awarded Gold Medal

Toronto.—Allan Brooks, Vancouver, B.C., artist-naturalist, has been awarded a gold medal by the Canadian National Exhibition for his work in the Wallace Havelock Robb collection of bird-paintings shown in the natural history section of the exhibition.

Will Resume Customs Probe

First Sittings Will be Held on October 25

Ottawa.—Sittings of the enlarged Royal Commission investigating the customs department will be resumed Monday, October 25.

This was announced by W. D. Euler, Minister of Customs. While the minister gave no indication of where the commission would sit first, information received here is that it probably will meet in Toronto. The Toronto sitting, it is expected, will be followed by others at border points in Ontario, and then the commission will likely go west.

Joined Socialist Strikers

Father Tries to Compel Dismissal of Son From Factory

Vienna.—A labor dispute attained an unusual extreme in Vienna when the father of a young cartwright, Ferdinand Rektorik, struck with the remaining 150 Socialist workmen at the local Fiat automobile factory to force the management to discharge his son, who is the only employee belonging to the rival Christian Social Union.

The management refused the workers' demands, but settled the strike by giving the younger Rektorik work outside the factory.

Lady Stanley Dead

Wife Of Famous African Explorer Was Seventy-One

London.—Lady Stanley, widow of the famous African explorer Sir Henry M. Stanley, died at the age of 71.

Lady Stanley was a noted beauty and was famed in artistic and literary circles. She was an accomplished painter.

Although Lady Stanley married Dr. Henry Curtis, a famous surgeon, in 1907, three years after the death of Stanley, she continued to be known generally as Lady Stanley.

Old Manuscripts Found

Unknown Poems Of Persian Poet Discovered In India

London.—The discovery of previously unknown poems by Omar Khayyam is reported in a despatch to The Daily Express from Karachi, British India. The correspondent says workmen in digging for a foundation for a building at Sehwan, in the Province of Sindh, unearthed a brass case containing manuscripts of many hitherto unknown quatrains written by Omar during his wanderings in Sindh.

Omar, a Persian poet and astronomer, died in the first quarter of the twelfth century.

Discuss Liquor Problems

Victoria.—Conferences between the liquor law administrators of British Columbia, Alberta, Saskatchewan and Manitoba were held here with R. D. Waugh, of Manitoba, presiding. The western provincial officials explained they had under consideration problems of liquor administration which have become common to the four provinces since they adopted the government control system. Their sessions are private and deal only with liquor administrative methods.

Krassin Returns As Envoy For Soviets

Seeks British Gold For Rehabilitation Of Russian Industry

London.—The return of Leonid Krassin to London as soviet envoy is thought to make the beginning of a new phase of Anglo-Russian relations. M. Krassin, as he admitted in a general interview with the British press, comes seeking money for the rehabilitation of Russian industry, and as he is a keen business man he realizes it cannot be obtained unless serious arrangements for the repayment not only of the new, but the old debts are made immediately.

His return is due to the culmination of a long series of secret negotiations with persons who, while not directly representing the conservative British Government, are in close touch with it.

The conservative government is very anxious to resume friendly relations with Russia for the sake of the Russian market, which, it is afraid, may go to Germany if the resumption of relations with England is long delayed. However, Prime Minister Baldwin still insists on a settlement in principle, at any rate, of the old debts. It is believed Russia is now willing to do this if not called on to pay too much and too soon.

The British also are disposed to insist on some guarantee that Russia will cease to interfere in the domestic affairs of Grat Britain, and is willing to give a guarantee not to interfere in Russia. This means Russia must promise to cease financing labor troubles in England.

Will Discuss Cable Dispute

But Canada Will Refuse to Have Matter Aired at Imperial Coofereoce

Toronto.—The Star publishes the following staff despatch from Ottawa:

"Canada's co-partnership in the Pacific Cable enterprise, like Canada's equal status within the Empire, is to be very definitely enunciated in London during the Imperial Conference.

"The Dominion, it is understood, will steadfastly refuse to have the Pacific cable dispute aired in the Imperial Conference, holding that it affects only the four parties to the agreement, Britain, Canada, Australia and New Zealand. The British authorities while yielding this point will take advantage of the presence of the overseas Premiers interested to seek a settlement of the matter.

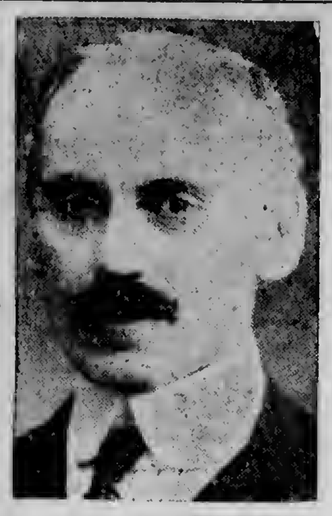
To Welcome Massey

Washington.—Welcome for the new Canadian representative to Washington, who, it is said, will be Vincent Massey, is expressed editorially by Labor, the official publication of the railroad employees' organization. Labor declares a better understanding of Canada is needed in the United States and says United States newspapers do not provide sufficient news concerning Canadian affairs.

Not Coming To Canada

Paris.—Princess Beatrice has decided not to accompany her sister Queen Marie, of Rumania on the latter's visit to Canada and the United States. The reason for her change of mind has not been made public.

The Smuggling Investigation



N. W. ROWELL, K.C.

Hon. N. W. Rowell, counsel for the Government, who will be associated with Mr. Calder of Montreal, in connection with the investigation of the smuggling charges.

Steamship Lines Feel German Competition

Liners Being Taken Off New York To Hamburg Run

Montreal. Competition from German steamship lines operating to New York from Hamburg is said to be responsible for the projected withdrawal in the near future of several British companies from that run. The White Star line, which operates the Arabic on a five weeks schedule to Halifax and New York, return being made direct to Hamburg, took this ship off the run after her departure from Hamburg October 2. The liner will be employed on the Antwerp, Boulogne, Southampton, Halifax, New York service, her sailing from New York October 30 being direct to Antwerp and the next from Europe will be out of the Belgian port.

The S.S. Amlanis of the Cunard Line has been on the Hamburg, Southampton, Cherbourg, Halifax and New York service, but it is expected she will be taken off on the completion of her schedule which calls for a sailing on October 26 and another on December 1 to Halifax and New York.

No change is being made in the Canadian Pacific sailings to Hamburg.

Curative Powers Of Sun

Pasadena.—The curative powers of the sun's rays are to be greatly increased during the next year, according to Dr. Edison Pettit of Mount Wilson Observatory here. He has announced the he has found that the ultra-violet rays of the sun, the part of the sunlight that cures some diseases and also causes sunburn, are to be more numerous in 1927. This is caused, he said, by the increasing spots on the sun.

May Succeed Aikins

Winnipeg.—Theodore A. Burrows, pioneer of Manitoba, who came west from Ottawa in 1875, is to be appointed Lieutenant-Governor of Manitoba, succeeding Sir James Aikins, according to a report from Ottawa.

Canadian Parliament Expected To Assemble On Tuesday, December 7

Wheat Pool Payment

Final Payment On 1925 Wheat To Be Made Soon

Winnipeg.—Several millions of dollars will be distributed among the farmers of Western Canada, members of the Wheat Pool, shortly.

The final payment on 1925 wheat delivered by members of the pools in Manitoba, Saskatchewan and Alberta probably will be announced early this week. A. J. MacPhail, president of the Saskatchewan Wheat Pool and vice-president of the Co-operative Selling Agency, will announce the date from his Regina office, according to information secured at the Manitoba Pool offices.

Mr. MacPhail is the chief official now in Canada, the others being in or en route to Australia. The Canadian Pool has already made three payments totalling $1.40, while many farmers are now enjoying the initial payment of $1 on the 1926 crop. Deliveries of the 1926 crop, however, are far behind last year's, owing to the wet weather. The total deliveries in Western Canada so far this year are about 40,000,000 bushels. Very little grain has been received from Alberta, but Saskatchewan has contributed 25,000,000 bushels, and Manitoba about 15,000,000.

Want Alberta Coal

Premier Ferguson of Ontario is Doing What He Can to Secure Supply

Toronto.—Commenting on the prospects for bringing Alberta coal to Ontario this fall, Premier Ferguson, of Ontario, said: "We have co-operated in the past with Liberal governments at Ottawa, with Farmer and Liberal governments in Alberta and with a Liberal trade commissioner there and have gone as far as we can. If there is an explanation for failure to obtain supplies from the West this year you will have to look to Ottawa for it.

"We cannot go up there and bring the coal to Toronto ourselves."

Mayor Thomas Foster, of Toronto, today wired Hon. Charles Stewart, Minister of the Interior; Premier J. E. Brownlee of Alberta, and John Imrie, president of the Edmonton Board of Trade, stating that the city wanted Alberta coal this winter and asking them what they could do to get a supply shipped here.

Making Use Of Radio

Talks on "Opportunities Overseas" Will be Broadcasted to London

London.—Arrangements have been made between the British Broadcasting Company and the High Commissioners for the Overseas Dominions, for the broadcasting of a series of talks on "Opportunities Overseas."

They will be written in the Dominions by prominent landowners, who have succeeded in the work taken up by them on landing from England and forwarded to London, where they will be broadcasted by 2LO by a representative of the Dominion concerned.

Royal Wedding Set For November 20

Stockholm.—The wedding date of Princess Astrid of Sweden and Crown Prince Leopold of Belgium has been set for November 20 in Brussels.

Ottawa.—Premier King and Hon. Ernest Lapointe, official delegates of Canada to the Imperial Conference, left late tonight for London. They are accompanied by a corps of secretaries and government officials acting in the capacity of technical advisers.

The leaving of the Prime Minister was preceded by a lengthy cabinet council at which a number of things were done. Colonel J. L. Ralston, D.S.O., was made minister of national defence and forthwith went to Rideau Hall to be sworn in; it was agreed that Parliament should be called for Tuesday, December 7; T. A. Burrows, ex-M.P. for Dauphin, was appointed lieutenant-Governor of Manitoba in succession to Sir James Aikins, whose term has expired, and Senator Wilfred Laurier McDonald was re-appointed chairman of the Montreal Harbor Board, which position he resigned on appointment to the Senate. Now he returns to it without salary, because being a senator he cannot have another source of emolument under the Crown. As a matter of fact he doesn't need it. The vacant position of Lieutenant-Governor of Ontario has not been filled but it is known that it has been offered to Sir William Mulock, Chief Justice of Ontario and political god-father of Mr. Mackenzie King. Sir William has the call but official action has not been taken.

While Mr. King is away, the ministerial by-elections are to be brought on and arrangements made for the parliamentary session. Th Canadian party to London will be back by the time Parliament assembles.

May Visit West

Sir Alan Cobham Is Planning Trans-Canada Flight

London. Sir Alan Cobham, upon whom the honor of knighthood was conferred a few days ago in recognition of the famous aviator's series of world-renowned flights, will visit Western Canada some time in the near future. It is stated in reliable quarters here. Cobham is planning a trans-Canada survey flight ,in which he will visit many many points in the Dominion. No definite date has yet been set for this projected trip, but it is said to be one of the flight plans entertained by the British are for the near future.

The Daily Express today said that Cobham was contemplating a trans-Atlantic 'plane flight and that it would likely follow a lecture tour throughout North America. Plans for this flight have been under consideration for some time, the paper stated.

Sir Alan Cobham but recently returned to London from a round trip to Australia, in which he proved conclusively the feasibility of such long distance flying if experienced aviators and worthy 'planes are employed.

Coal Strike Affects Brazil

Rio De Janeiro, Brazil.—The British coal strike is crippling Brazil's transportation facilities, the government having cut down train service in order to reduce the consumption of coal. The shortage in coal is due to the fact that many steamers have discontinued the South American trade in order to handle the more lucrative transport of coal from the United States to Europe.

Striking British Miners Have Rejected Terms Offered By Government

London.—The delegate conference of the Miners' Federation by an overwhelming majority, rejected the Government's offer to create a national arbitral tribunal for the settlement of the differences between the miners and mine owners, and by an equally large majority voted in favor of the withdrawal of the safety men from the mines.

Thus the Government passes out of the dispute, temporarily at least and the owners and the men are left to fight out the struggle between themselves.

The delegate conference adopted a resolution rejecting the Government's proposals for a settlement of the strike after the announcement of a district vote, which opposed the proposals, 737,000 to 42,000.

The South Wales resolution to withdraw the safety men was adopted by the delegates 594,000 to 194,000."

The government had already made it plain that unless its offer was accepted by the miners, it would be withdrawn immediately. The principal feature of the offer was governmental assurance that if the miners returned to work they would be accorded governmental assistance in obtaining a nation-wide agreement, which is one of the important demands of the miners.

The decision of the miners was taken in the face of practical exhaustion of their resources. In addition, their position is daily becoming weaker by a slow drift of the miners back to work. Withdrawal of the safety men, if put into effect, is considered likely to cause serious trouble not only in the mines, but between the strikers and those desiring to return to their labors.

Indian Summer in Canadian Rockies

Miss Gladys Bozlee of Portland, Oregon,—a Denishawn pupil—poses on the Victoria Glacier, two miles from the Chateau Lake Louise.

Miss Bozlee plans to bring a class of pupils for instruction in aesthetic dancing to the Chateau Lake Louise next summer.

Half-a-Million Chinese Are Facing Death In Besieged City of Wuchang

Hankow.—Penned up more than a month by the Red Cantonese armies besieging the city, 500,000 Chinese people face death by starvation, cold and gunfire in Wuchang. Large numbers of dead lie in the streets. Those remaining have eaten dogs, cats and rats and are dropping in public places or dying miserably in shelters into which they have crawled.

The Northern troops of Marshal Wu Pei-Fu, garrisoning the city, having been refused terms of surrender, are holding on desperately, hoping for armies of their ally, Sun Chuan Fang, to break through the Cantonese cordon.

Meanwhile the relentless and well-fed Cantonese outside the wall rest patiently on their arms, having blockaded all exits from the city and await the time when they shall enter. What will happen then is not known.

A vestige of mercy has been shown. Beginning last Sunday, women and children of the impoverished classes have been permitted to pass through the gates to the river, seeking passage across to Hankow. Thirty-eight thousand have been rescued by boats bearing the emblem Hankow to be cured for.

Scenes of horror are witnessed each trip of the boats. In the fight for places on the boats several hundreds have been trampled to death as the maddened hordes struggled for rescue. Many, thrown into the river, are drowned.

Only a few miles away are the troops of Sun Chuan-Fang, ruler of the five provinces of Eastern China, trying to thrust aside the Cantonese who oppose their march to the relief of beleaguered Wuchang. Seemingly relief must come to the Wuchang defenders within a few days.

Strange Insurance Policies

Lloyd's Appear to be Ready to Issue Insurance Policies Against Any Untoward Happening

Whenever war looms on the horizon Lloyd's is ready to issue insurance policies that hostilities will begin within a certain time.

Whenever a king or some other personage lies on the threshold of death, Lloyd's will sell insurance at commensurate premiums, of course—that he will die before the week is out or within whatever time limit the policy holder stipulates.

Lloyd's always is willing to insure persons that earthquakes, marine disasters or other catastrophies will not take place within a given time.

It is natural that under these circumstances Lloyd's suffers enormous losses on a large percentage of these policies. But on the other hand, its income from the same source, and particularly from the smaller policies concerning affairs of inportance to only a few, is even larger, with only now and then a bad year for the underwriters.

In the weeks before King Edward died there was a good deal of speculation as to how much longer he would live. When his condition was first reported as serious, Lloyd's issued policies at 30 per cent that he would die within six days and at 50 per cent that he would die within fourteen days. But King Edward lived through the two weeks, and Lloyd's lost heavily.

The trial of Harry Thaw, in New York, for the murder of Stanford White, in 1907, was another occasion for a good deal of betting. Lloyd's underwriters decided that Thaw would not be executed and they issued policies for huge sums at heavy odds to back up this opinion. Thaw is living and Lloyd's underwriters still remember the golden harvest they reaped on that occasion.

A British peer took out a policy of £10,000 against his niece's elopment within twelve months. He paid £1,000 for the premium. The year passed without the young girl's eloping, but the nobleman breathed easier, despite the money he had lost because his fiancee had not made an undesired marriage.

There are young men who take out policies that they will not grow bald before they are married, and young women who insure their comely features or shapely lines and shoulders against all eventualities.—New York World.

Valuable Watch Stolen From London Museum

Belong. to Oliver Cromwell and Was In Good Order

Scotland Yard states that a valuable watch was stolen from a showcase by breaking a padlock—in the London Museum.

The watch is officially described as follows: "Oliver Cromwell's watch, made by B. I. Barnes, at Worcester, formerly the property of the Prince Regent, George IV. Oval in shape, the body of watch is 1¾ inches long by 1⅛ inches wide, engraved silver, weight 2½ ounces. On dial in silver (only one hand) view of the spires of Worcester Cathedral and two rabbits browsing. The watch is in going order, except for the fusee, which has perished.

"Enclosed in a modern silver case inscribed as follows: 'The gift of His Royal Highness the Prince Regent, 24th June, 1816, to Bernard Attenhoffer from Zurzach,' and on the inside, 'This watch originally belonged to Oliver Cromwell.' The whole enclosed in a morocco case."

Searching For Rare Animals

Expedition Starts for Unexplored Parts of Abyssinia

The Chicago Daily News and Field Museum of Natural History expedition has set out to sea from Marseilles, France, bound for the unexplored parts of Abyssinia. The five members of the party are taking with them 5,000 pounds of scientific equipment, arms and ammunition.

Dr. Wilfred Osgood, curator of the department of zoology of the Field Museum, and leader of the expedition, said that it would probably be six to eight months before the party secured the rare animals for which it is searching. These include the Queen of Sheba's antelope or Nyala, the Dallada baboon, the reticulated giraffe, the pygmy goose and the black-maned lion.

The party will land at Jibuti, in French Somaliland, and travel from there to Addis Abbaba, in the heart of Abyssinia, by rail.

A man's curiosity never rivals that of a woman until some one casually mentions that his name appeared in yesterday's paper.

How Fanatics Are Handled In England

Most of Them Allowed to State Their Grievance

Take it from us that when the staid, steady-going Britisher wants to do something spectacular he can put it all over any of the mercurial emotional races on earth.

The other day a barefooted, hatless man heavily manacled in rusty chains tied around his neck and fastened to wrists and ankles made a sudden appearance at the door of the Downing street residence of Premier Baldwin. This would be the equivalent of a like appearance at the door of the White House. Inspectors on duty descended upon the man, who explained that he merely wished to present a petition to the Premier, calling attention to the condition of the unemployed. He was permitted to hand the petition to the Premier's butler and then disappeared around a corner into a neighboring garage where he divested himself of his paraphernalia and disappeared.

We are not quite sure, what would happen to an individual who, thus attired, should present himself at the White House. He might be speedily clouted over the head as a dangerous person. We are quite sure he would be dragged off to the police station and quite likely be sent to the psycopathic ward for observation.

They have a better way of handling such incidents in England, where they go on the theory that it is much better for all concerned to let the disaffected get it out of their systems as speedily as possible and make no fuss about it. They know that escaping steam never did anyone any harm.

Another Labor-Saving Device

Iron Presses Clothes on Wearer While He Waits

Of all the labor-saving devices lately perfected, none amuses more on first hearing than the new flat iron which presses clothes on the wearer while he waits. Steam is generated by electric heat, and the canvas bottom of the strange iron. This steam, it is said, removes every wrinkle and raises the nap of the garment. The wearer experiences no discomfort, and in a few minutes his suit is renewed and once more beautiful.

Perhaps this is the kind of thing used in the gas station with the tailor shop attachment of which rumor hath spread abroad, the Oswego, N.Y., Palladium-Times says. The weary traveller, in the new fashion, while he delights to gas and oil his steed, may have his clothes pressed while his family consume their orange pop, sweet chocolate and ice cream cones.

All of which does very well. And there can be no doubt about the potential value of labor-savers. The only doubt arises when one considers the problem of what is going to be done with all the saved time and labor. If the human ironing-board is going to use his extra minutes in a quiet and restful contemplation of nature and the universe, good enough. If he is just going to run around and burn up some more gas and add some more noise to an already noisy universe—but who has any standards of values nowadays, anyhow?

Should Often Go Barefoot

Walking Without Shoes is Good For Feet Says Chiropodist

"Walk barefoot in the sand or grass if you would avoid foot troubles," Dr. J. J. Monahan, of Chicago, stated before the first convention of the Ontario Association of Chiropodists in the Prince George Hotel, Toronto.

Pointing out that each part of the foot was adapted primarily to some special work, Dr. Monahan stated that to convert a normal member into a deformed, aching foot it was only necessary to have certain parts of the feet perform functions that they were not suited to.

According to the speaker, that part of the foot which today is more abused than any other is the heel, the portion which should bear the weight. But high heels had shifted the burden, as it were he said, and as a result a great number of foot ills were brought into being.

Growing Tobacco in North

Tobacco may be grown in every part of Canada, even north of the 55th degree, a bulletin of the Canadian Pacific Railway announces. The tobacco plants are grown as are cabbage. When the last spring frosts are over the plants are set out. One Alberta farmer, living north of 55, has never failed to produce a crop.

First colored boy: "Boy, you is so thin you could close one eye and pass as a needle."

Second colored boy: "Dom' you talk, mister; you is such a little thread you could pass through ma closed eye."

Some men wouldn't take advice if it were offered to them in capsules.

Many Chinese Live In Boats

Millions Know No Other Home Than the Sampans

A large proportion of China's enormous population live in boats upon the rivers and waterways. Especially is this the case in the provinces of Southern China, where whole families sometimes of several generations, live together in sampans, as the flat-bottom boats are called.

At the large ports and on many of the rivers the sampans are so closely packed together that they resemble a floating town. These water-towns have their own shops, inns, and business establishments, moored to the banks, where trade is carried on just as it is on land. The inhabitants spend their whole time trading up and down the river coasts.

Though as a race, the Chinese are used to over crowding and unsanitary homes, it is a marvel how human beings can exist under such crowded conditions as in the limited space of a sampan. A patriarchal family, of perhaps five or six members, will live year after year in a crazy fishing boat no larger than the entrance hall of an average London suburban villa.

The Chinese are the most adaptable people in the world. Millions of them are born and die in these boats and know no other life, and they seem happy enough under the difficult circumstances.

Woollen Mill for Alberta

A proposal to establish a woollen mill at Edmonton, Alta., has been made by F. H. Copp, who has been operating a mill at Port Elgin, New Brunswick. Mr. Copp's clothing mill was destroyed by fire in August, 1921, and he has since been engaged in the manufacture of yarn. He has shipped mackinaw material to Edmonton, and is satisfied that Northern Alberta offers a splendid location for a woolen mill.

The Japanese estimate that on a Japanese standard of living the world could support 2,500,000,000 people; while only 1,000,000,000 could live under American standards.

A new style of typewriter has been invented by a Washington man who claims it is capable of 150 words a minute. The machine has 1,160 keys.

Students Prefer To Study Bible

Chose It Instead of Hindu Sacred Books Says Ghandi

Mahatma Ghandi, who is teaching the Christian Bible an hour a day in the national university at Ahmedabad, India, was taken to task by the Hindus.

"I will teach what the students want to learn," Ghandi replied.

"When I was invited to teach an hour a week, I gave them their choice between reading the Hindu Sacred books, 'Gita and Ramayana' and the Bible," he continued. "By a majority vote they decided on the New Testament. The boys know all about the Gita, but want me to teach them the Bible, since it is known I have made a great study of that book."

Willing To Oblige

Professor Dana Offered Use of His Flivver to Henry Ford

Professor Harry Dana, of Boston, a grandson of Henry Wadsworth Longfellow, was recently conducting Henry Ford through the Longfellow house in Cambridge. Mr. Ford was expecting his Lincoln car to call for him presently, and to take him back into town for dinner, but as much time passed, and the automobile still failed to arrive, Mr. Ford became more and more nervous.

At last Mr. Dana thought it was high time for him to intervene tactfully, "Mr. Ford," he said in his earnest manner, "if the worst comes to the worst, I can drive you over in my flivver."

A Baker's Dozen

"A baker's dozen," signifies 13 for 12. When a heavy penalty was inflicted for short weight, bakers gave a surplus number of loaves, called the inbread, to avoid risk of fine. The 13th loaf given to the dozen was called the "vantage loaf." The slang expression "baker's dozen" is to give a man a sound drubbing, i.e., all he deserves and one stroke more.

The knowledge that one-half the world doesn't know how the other half lives is a constant source of worry to some people.

Students Taught How To Handle Hecklers

Methods Used by English School Interested Lloyd George

David Lloyd George, himself the centre of many a verbal battle with hecklers, was an interested spectator recently of the methods used by the school for Liberal speakers to fortify students against the terrors of heckling.

Several speakers were chosen by lot, and a group of expert hecklers were chosen to annoy them. The hecklers permitted the speakers almost to reach their points before hurling disconcerting questions at them.

"What do you mean by incubus?" demanded one heckler. "Is it some kind of an incinerator?"

"If the gentleman will come forward," replied the student speaker, nonchalantly, "I will show the audience what an incubus is like."

Lloyd George smiled broadly.

Useful Clock For Autos

Invention Does Many Things Besides Telling Time

A combined clock, water gauge and thermometer has been invented for motor cars. It will fit any lock-on radiator cap. The hands and figures of the clock are illuminated so that they are visible on the darkest night. As the timepiece is directly in the driver's line of vision, it is never necessary for him to take his eyes from the road. The thermometer gives the temperature of the radiator and the gauge tells of any shortage of water.

A Leading Woman Capitalist

Viscountess Rhondda, is England's leading woman capitalist. Lady Rhondda succeeded to the estate and business interests of her late husband, and instead of placing a male representative in care of her interests she entered the world of finance and business herself, and year by year she has increased her holdings and her responsibilities. She is now an active director in twenty-eight major industrial enterprises.

The man who renders the greatest service to his day and generation is the man who makes people laugh.

Fresh Natural Scenes With New Road

Beautiful Emerald Lake, now accessible. Left insert—pointing out wonders of Lake McArthur. Right insert—Sluckaie Canyon, Banff-Windermere Highway.

There is a fresh unfolding of the wonders of nature in the new scenic area opened up by the Lake Louise-Field Highway through the mountains. The glories of the Yoho National Park in British Columbia, the Yoho Valley and Emerald Lake are now accessible to the motor world. This latest achievement is the completion of a motor highway across the famous Kicking Horse Pass in the central Rockies.

From Lake Louise, the gem of the Rockies, the road proceeds west through avenues of pine and fir, up to the Great Divide at Stephens. By easy grades the motorist glides down to Lake Wapta, the centre of a romantic and picturesque region. The descent continues through the Kicking Horse Pass to the Yoho Valley. Here, in British Columbia, a part of the abandoned right of way is used and some of the finest scenery in the world is unrolled. There is a marvellous view of the Yoho Valley ending in its glistening glacier.

Winding down the side of Mt. Stephen, the traveller comes to the flats and Kicking Horse River, between Mount Stephen and Mount Field. On the face of Mt. Stephen can be seen, a few hundred feet above, the opening to the silver-lead mine, which is reached from the flats, by a winding trail. This mine, opened in 1885, is unique in its operation and in its situation, on the side of a grim mountain. It is worth the effort of a trip up the incline and offers fine opportunity for the amateur climber.

Driving along the river flats, the trains can be seen, many feet above, winding their way along the side of Cathedral mountain. Down the river valley; the new road connects with the existing motor road which reaches eight miles up the Yoho Valley to Takakkaw Falls. The euphonious Indian name, meaning, "It is wonderful," well describes the beauties of the ribbon of water, with a fall of 200 feet, in clouds of foam. Another branching, tree-lined avenue leads to Emerald lake, a distance of seven miles. This lake, of exquisite coloring, lies placid under the protection of Mounts Wapta, Burgess and President, and affords fine fishing.

At field, the natural bridge is one of the points of interest. A road is to the western boundary of Yoho park, under construction from this junction. Then it will be linked up with a highway now being built from Golden.

These roads will give the motorist a scenic loop, probably without parallel in the world, which will include the finest scenry in the Rockies. From the prairies, by way of Banff and Lake Louise, down to Field and Golden, the road turns south by way of the Columbia, to Windermere valley. Through its western gateway to the Banff-Windermere road, the return to Banff and on to the Prairies, is made.

The Banff-Windermere highway is already connected on the west, by the Columbia River road, with the 4600 loop, known as the Grand Circle tour, which stretches down the Pacific coast to southern California and returns by way of Arizona, Utah, Wyoming and Montana. The whole highway touches, throughout its length, ten national parks in the United States and Canada. The beauties of the Canadian section, so recently opened to the world, are rich in promise for the motorist.

Goat Raising

Sturdy Little Animals Finding Favor With B.C. Farmers

Goat raising has become an important branch of agriculture in British Columbia, according to the Natural Resources Intelligence Service, Department of the Interior at Ottawa. Goat milk finds a ready market at from 15 to 25 cents per quart in Vancouver and Victoria and the yield runs as high as one gallon daily per animal, although the usual quantity is from three to six pints. The Nubian goat is said to yield as much as 3 to 4 quarts per day of superior milk. This milk is highly recommended by doctors for feeding babies and invalids. Butter and cheese made from it are highly prized by those who have learned to use these products. The skins of goats are utilized for gloves and in the production of leathers of fine textures and high value used in bookbinding, etc. Goats are easily cared for and many of the B.C. herds are attended largely by children.

The animals are milked morning and evening the same as cows. Good feed and properly balanced rations are just as necessary for the milking doe as with the dairy cow. One and one half to two pounds of grain and meal daily are recommended by Mr. A. A. McMillan of the Dominion Experimental Farm who is also authority for the statement that there is good money selling goats' milk even as low as ten cents a quart, at which price its valuable digestive qualities and richness would ensure it an inexhaustible market.

Goats have hitherto been confined to the Old World, being especially numerous in the mountain sections of Europe and Asia. Both sheep and goats are typical mountain animals but goats will thrive wherever there are green shoots and shrubbery. They do not, like sheep, confine themselves to grass.

The domestic goat is represented by many sub-varieties which differ in the length of the hair, in color and in the shape of the horns. In the short-haired class (the English goat) the coat is thick and close, with an undergrowth of woolly character. Both sexes are horned, but in the male the horns are more developed. The color is either white, gray, fawn or black. The long-haired (or Irish) goat is more frequently swarthy red, although occasionally white or pied. The horns are large, corrugated, and pointed, and rise close together in parallel lines. The coat is shaggy and the head large and ugly. The Angora and the Kashmir goats are often confused but are in reality distinct. Both yield hair of beautifully silky texture, and both carry a second quality of coat which resembles wool. In the Angora goat the woolly portion of the coat is outside the hairy covering, but in the Kashmir goat the wool is next the skin. The Nubian goat carries short, black, twisted horns, the ears are pendulous, the legs long, and the coat of the female is extremly short. The Maltese goat is generally hornless, and is cream-colored. The Syrian goat has very long ears and very long hair, and its horns are erect and spiral.

The commercial success of the goat herds in British Columbia not only points to similar possibilities in other Canadian provinces, in all of which there is little doubt but that the goat would make a splendid revenue producer and family asset, but at the same time there is available the splendid climatized and registered stock of the B.C. herds and the experience in breeding and marketing which B.C. owners have gone through with such conspicuous success.

The Canadian Way

Crime is Adequately Punished says Spokane Paper

At Winnipeg three highwaymen held up a citizen and robbed him of $1.90. In some parts of the United States a crime of that magnitude would have been looked upon as a minor escapade, calling for a jail sentence of a few days, or a paternal rebuke from the Judge. But this sort of leniency is not awarded to highwaymen in Canada. One of the convicted men was sentenced to three and one-half years' imprisonment and twenty lashes, ten lashes at once and ten when his term expires; another to three years and twenty lashes, and the youngest of the trio was given three years and a paddling. If the American people could bring themselves to adoption of that treatment, they would see a slump in crime.

Lady—And why did you leave your last place?

Tramp—I was discharged for doing well, mum.

Lady—For doing well! Where on earth were you?

Tramp—In 'orspital, mum.

The first time he went to church they threw water on him the second time rice and the third time earth.

CHAPTER XVI.—Continued

As Yvonne moved through her rooms, with a word here and a nod there, her eyes sought a single face. When she failed to find it she spoke to the butler who stood at the post in the reception hall. The man gave her the information she sought.

"Mr. Brandon has just arrived, Madame."

She went at once, stopping only for a subtle challenge to a judge who that day had delivered from his bench, a heavy homily upon the frailty of a modern mother, to a door that led off from the reception hall into a tiny room which, after the Continental fashion, she called a morning room, reserved for her own exclusive use. Brandon stood by a cabinet with a siphon and glass in his hands. He turned to greet her.

She went directly up to him. He gave her an intimate glance, that not only appraised her, but estimated every artifice of her. For an instant she swayed toward him, yielding, expectant. But she read in his face that he would not take her in his arms. She was immediately self-possessed. Gayly she fluttered her fingers across her own lips and then touched them, lightly, to his. "Am I pleasing to my lord?" she demanded, dropping him a mock curtesy.

"That's an idle pretense, that question," he replied. "What you really want to know is, are you tempting."

"A woman never asks that," she returned. "She needs no help to satisfy any such curiosity."

"I fancy that point might be argued," he observed, "but we will compromise. You are very beautiful, which pleases me, and very alluring, which gratifies you. What more shall either of us desire?"

Some quick reply, perhaps a reminder of some sort, hovered at her lips, but died unspoken. "Nothing else," she said, "and thank you. If I have done my own attractions justice, perhaps you will agree that I have done even more—that I have made two women beautiful, tonight, for your satisfaction!"

"You mean the girl, of course. But her?"

She looked up at him, steadily. She spoke softly. There was no trace of bitterness, or, even accusation, in her tone, but there was something feline in it. "I believe you are going to tear this girl to pieces, if you can. Whether it is because you do not approve the bizarre method someone has used to lift her up, and you merely want to pull her down, I don't know. I think there is something stronger than that in your mind. But I am of the opinion, my dear, that it won't be so easy!" When she paused, she turned away from him slightly. There was a tinge of color in her pale cheeks.

"You are absurd," Brandon said evenly. "And, I think, just a bit piqued. It is a delightful mood. If one of us should make the girl unhappy, I fancy it is more likely to be you than I."

She gave him a bright smile. The color had gone from her cheeks, and she was taunting again. "Now you are accusing me of the possibility of jealousy. I'm never jealous my friend. Not, even, for you. I served you willingly in luring her into my keeping. Teddy Dorminster and Roddy Kenilworth already are devoted to her. Teddy has assured me he's willing to trade all his married women, in one grand bunch for her. And Roddy declares that she is more refreshing than champagne. So you must admit I'm generous—two of my devotees already are at her feet. And you are hovering about them. I shall—"

She paused. For some reason she decided, suddenly, to both light a cigarette and point toward the cabinet where glasses and bottles were. "A little wine, please," she commanded. When he had brought her glass he said:

"You were about to say something interesting. Finish it."

"I was about to add that probably I shall learn some things I really want to know, because of Joanna, but they will be interesting. Come. It is time she made her entrance. Everybody has had just enough to drink to fully appreciate her."

Together they passed into the reception foyer. Through the wide flung doors, in which palms were banked, strains of dance music floated down from an orchestra hidden on a miniature balcony that crowned one end of the high ceilinged room reaching off on either side from the upper landing of a broad handsome stairway that sloped down majestically into the drawing room itself. "A woman always looks her best when she is descending a stairway," was one of Yvonne's pet assertions. She had had this one especially built into her house.

At the fringe of the dancing crowd in the larger room Dorminster and Roddy Kenilworth talked together both men searching the throng of guests for their hostess. Lord Teddy spied her, and Brandon, immediately. Both asked for Joanna when they had hurried to pay their compliments. "A little patience," Yvonne remonstrated. And she admonished them: "There must be no stealing her away for selfish confidences. I want her to know everyone, tonight."

Brandon touched her arm. "Here is someone who will make his own rules, perhaps, about an hour alone with her," he said, indicating a young man, who had just delivered his hat and coat to the doorman and who, evidently a stranger in a strange house, seemed not to know what to do with himself.

Yvonne did not know the new comer, and looked at him curiously. Like the other men, he was in evening clothes, but in his manner was that intangible something which betrays the one whose full dress is only an occasional ceremony. Always quick with her appraisals Yvonne decided in a flash that the stranger would not be one, if he were cornered, with whom a woman might safely play. She was amused with herself, however, for admitting such an idle reflection, and puzzled by it.

Brandon, who had greeted the other, brought him to her for presentation. "Mr. Wilmore," he said. "You have heard me, and, no doubt, Miss Manners speak of him."

Yvonne, with characteristic impulse, gave him both her hands, a gesture which brought a flush into his face. Her voice and smile were warm. "This would be John," she said. "You see I have only heard Joanna call you that. She has been very eager for your coming. She is just about to make her first appearance."

John plainly was ill at ease. He had expected Joanna to be waiting for him, and for him alone. He was not prepared for this sort of introduction into her new surroundings. Brandon chatted with him easily, and brought up Kenilworth and Dorminster. "They have both begun to be amusing to Miss Manners," Brandon explained: "So far, we are her main circle of dependents."

The music that came down from the balcony suddenly died away, leaving a confusion of voices that ends a dance. Already women who shouldn't drink champagne, and men who insisted that they do, were giving hints of the effects of it. But, as unexpectedly as the music had subsided, there was a general commotion, and then a hush. The four men, John among them, stepped through the palm flanked doorway and into the larger room. Yvonne, completely beautiful, a striking figure in the shimmer of her black and the sparkle of the diamonds at her throat, stood a few steps up on the stairway. Her voice, silver tinkling in it, floated over the assemblage—the assemblage of those who were good and not so good:

"My friends," she called to them, "I am in a daring mood tonight. Just how, and why, some of you will determine quickly. I am about to present to you something that is very fragile, and new, and fresh, and something eager to be shaped into the best fashions of the day. It is just a girl whom I have taken very close to me and who thinks that she should be like me. Some of you will disagree with her, and, perhaps, plan to make her different. Others will have ideas of their own. I commend her, to all of you—and am curious to know whether it shall be you, or her, who profits most."

She raised her jeweled hand, while the murmur of wondering voices grew, and gave a signal.

(To be continued)

A Defense Of Gossip

Keeps More Men Straight Than The Police Do

I am possibly the only man living who has spoken a good word for gossip, which keeps more men straight than do policemen.

A thief does not fear gossip, but a halfway respectable man does, and needs it. Gossip is a tremendous power in regulating the better institutions.

Ask a banker: gossip may ruin him over night.

We get the truth in gossip; rarely in newspapers, speeches, and sermons. Gossip is vicious, but it is also free and candid; by weeding out the palpable exaggerations, we get the truth about every situation.

Gossip abuses everything more than it deserves, but finally settles on the real facts; idealism praises everything more than it desereves and never reaches the truth.

It's a pity the law does not hear of evil acts as soon as the neighbors, but it does not, and we are entitled to protection while the slow-moving Law is getting out a warrant and summoning witnesses; most of whom will not testify as candidly in court as they do on the streets.

This protection we get from gossip. If gossip declares up and down the street today that a certain man was last night seen entering a certain house where he had no business, he will keep away from there tonight.

Finally the gossip will get around to the sheriff, and, if of sufficiently serious nature, he will investigate tomorrow.

A man named Pinkerton has a reputation as a detective. All the facts Pinkerton reports to the prosecuting attorney or grand jury have been dug up by gossip.

A Natural Conclusion

A young bride-elect was ordering her trousseau in London before going out to New Zealand to be married. The dressmaker suggested only very warm clothing, and when the bride demurred, asserting that the climate was beautifully mild, she was immediately informed: "I assure you, madam, you are mistaken. New Zealand is where the frozen meat comes from."—Pearson's Weekly.

Children Cry for

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of Chas. H. Fletcher. Proven directions on each package. Physicians everywhere recommend it.

Thief! Is What He Calls Headache

Brooklyn, Mr. Richard A. Davidson writes—"A headache is a thief, because if I figured up the number of days I was unable to do my best work on account of a sick headache, it would amount to hundreds of dollars. I have found the best relief for sick headache is Carter's Little Liver Pills. They have rarely failed to clear my attacks and they tone up my stomach and bowels in fine shape."

Chronic sick headache is many times irregular bowel movement. Try Carter's Little Liver Pills. Druggists, 25 and 75c red packages.

Dress For Comfort And Not Appearance

Radio Artists Mostly the Reverse of Smartly Dressed

It is perhaps as well that radio listeners do not see the artists who are performing, else pleasing impressions might be dispelled. Listeners do not know how they look, but when a beautiful soprano voice or a heavenly tenor is heard it is easy to picture a beautiful lady or a romantic figure of a man.

Not so. Someone who is behind the scenes has been talking, and it is said that the artists mostly are the reverse of smartly dressed and look nothing like the part they are enacting. Famous ladies are reported to be attired in a manner more fitted for comfort than appearance, and tenors who thrill the audiences with passionate lyric airs from the operas, are described as coming to the microphone with their coats and vests off, minus collar and tie, and with the neck of their shirts rolled back. The reason given is that formal or stage attire hamper their vocalism.

Yet there is a famous tenor who always puts on a dress suit when he sings before a microphone, although nobody sees him except the officials at the broadcasting station. When his friends laughed at him he said: "When I am nicely dressed I feel good and I can sing with more enjoyment. My unseen audience gets better results accordingly."

There is a great deal to be said for that. Everybody knows the tonic effect of new clothes or of putting on a "dress suit." There is a mental reaction to smart attire, which shows itself in buoyancy of heart and therefore one "feels good."

When a singer isn't making the best of his song over the radio, we may feel like bawling into the machine: "Go and put a dress "suit on."

Game In National Parks

Due to the fact that all the Canadian National Parks are game sanctuaries, where no one without permission may carry a gun or kill any animal, or bird, wild life is increasing rapidly and is a source of great enjoyment to tourists.

Temptation is the balance in which character is weighed.

Girls! Good Health Adds To Your Personality—Makes You Attractive To Men

Bright eyes, a clear complexion, rosy cheeks, animation, make for beauty every time. A well woman is always beautiful.

Take a bottle or two of that well-known herbal Tonic, which has stood the test of time, namely,

Dr. Pierce's Golden Medical Discovery.

Thousands in every Province have testified that instead of being pale, weak and tired this Discovery gave them renewed vitality.

The Speed of Hurricanes

Bulletin Explains Why Accounts of Velocity Vary

Many people have been puzzled how to reconcile the apparently widely divergent accounts of the velocity of the wind during the West Indian hurricane that struck the southeastern coast of Florida last week-end. They read in one place of winds moving at the rate of 120 miles an hour, and in another that the centre of the hurricane passed over the country at the rate of forty miles an hour. A bulletin on hurricanes issued by the National Geography Society of the United States not only explains the peculiarities of hurricanes, but provides answers to various questions that occur to the interested layman.

"Hurricanes," the society's statement says, "are not winds that drive straight ahead. They are swirls of the cyclonic type. These swirling storm centres move relatively slowly across land and sea, sometimes at no greater speed than eight or ten miles an hour. But they suck air towards them from all sides at terrific speeds, up to a hundred or more miles an hour." These West Indian hurricanes, anticipated every year on the Gulf coast, are probably as old as the Atlantic ocean and the North American continent. The first storm of the kind on record "devastated parts of Cuba in 1494."

Says Civilization Is Killing Off Indians

Thrive as Savages Declares Woman Physician In Alaska

Civilization is rapidly exterminating the Indians and Eskimos of Alaska, Dr. Anna S. Kearsley, thirteen years a physician among natives of the territory, declared at Seattle.

"The white man's civilization is ruinous to the natives," she said. "They want to be civilized, and the government wants to civilize them. But they seem to absorb all the bad things of the white man's life and none of the counteracting good things. They should be allowed to remain in their former wild state, to hunt and fish, as they did for ages, in the open. Not one in a hundred is benefited by education. Their habits are uniformly filthy and unsanitary when they attempt to live as white men. As savages, they thrive. As wards of the government they are dying out."

Dr. Kearsley has worked in United States hospitals for the Indians and Eskimos at Wrangell and Sitka.

German Soldier Has Returned War Loot

Took Silverware From Chateau Where He Was Billeted

The mayor of the town of Ham, near Amiens, which was occupied by the Germans during the war, has received a bulky, heavy registered package postmarked Altona, Germany. The official feared it contained an infernal machine and had firemen unpack the box.

Inside was discovered a quantity of silverware, knife, forks, spoons, and plates with a letter saying:

"I was a German soldier billeted in a chateau near Ham during the war, and I took these things as souvenirs. I am ignorant of the name of the owner of the property, but he doubtless can be identified by the crest and monogram on the silverware. My conscious hurts me and I am hereby returning the property."

The authorities of Ham are seeking the owner of the silverware.

Little Helps For This Week

Be not overcome of evil, but overcome evil with good.—Rom. xii. 21.

The common problem, yours, mine, every one's,
Is not to fancy what were fair in life,
Provided it could be, but finding first
What may be, then find how to make it fair.
—Robert Browning.

This world is a world of men, and these men are our brothers. We must not banish from us the divine breath; we must love. Evil must be conquered by good; and before all things, one must keep a pure conscience.
—Henri Frederic Amiel.

He was in a smallish way of business and his creditors were pressing him severely. So he wrote to one of them as follows:

"Dere Mister,—I see you are asking for a cheque or cash to settle your account. If you want a cheque, I can send it at once. But if it's cash, you'll have to wait."

Vanity is about the only intellectual entertainment some people seem to have.

Other people's mistakes cause us a lot of unnecessary trouble.

Plans South Pole Expedition

Steamer, whaler and a Dernier airplane will be used by an expedition headed by Antonio Pauly, an Austrian, in efforts to reach the South Pole within a few months. Pauly said that the expedition will sail from Buenos Aires on November 15.

GIRLS AND WOMEN NEED RICH BLOOD

This Lady Found Dr. Williams' Pink Pills a Friend Indeed

Just because she is a woman there are times when every woman needs help and strength in the form of a blood-building tonic.

To thousands of girls and women Dr. Williams' Pink Pills have proved a blessing because they enrich the blood, give strength and restore tone to the aching nerves. The anaemic girl who is languid and pale, the wife whose back feels like breaking; the matron whose health fails as she reaches middle age—for all such sufferers Dr. Williams' Pink Pills are invaluable because ill-health in girls and women is usually caused by poor blood or insufficient blood. These pills have proved a blessing to thousands of others, why not you? At various stages of life Mrs. G. R. Lake, Walton, N.S., has proved the value of Dr. Williams' Pink Pills. She says. —"I first used these pills when a young girl, for it is during the 'teen age when nature calls upon every bit of the reserve strength we have, that we need their rejuvenating help. It was then I found Dr. Williams' Pink Pills a friend indeed. And again, now that the girlhood stage is past and I am a mother of four children, subject to all the cares and worries of the home, Dr. Williams' Pink Pills is the only tonic I take to keep up my health and strength, and they have never failed me. Should any ailing girl or weary mother, due to my advice try these pills, I know they will find them as equally good as I have done."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

The minister who writes out his sermons is more apt to realise their length.

For years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

Don't think because a judge is small that he isn't a fine-imposing man.

"Sterling" means a coin of true weight, and is derived from the "Easterlings," German traders who coined pure money in England in the thirteenth century.

Wherever disaster strikes—
Wherever the sick and suffering cry for help—
There is Red Cross!

It asks your help Now is the time to give

Fall Plowing Pays Dividends

Continued from over-page

the spring of the year one may kick these clods and they fall to pieces into a mass of fine grannles. This is one benefit of fall plowing Furthermore the soil is left in a loose state during the winter, and when covered with a blanket of snow makes it very desirable and possible for the soil society to work unmolested. The temperature is kept just right and while the farmer rests snugly throughout the winter our soil friends are busily engaged producing a fertility and a possible soil structure that gladdens the farmer's heart.

Proper preparations in the spring of the year following fall plowing when the soil contains moisture snch that the clods fall to pieces with a jar is the time to do the spring preparation. Snch work will indeed give a majoriy of our cultivated soils a fine home for plant roots.

In districts where there is little snow fall it is advisable to pack down the fall plowing and break up the large clods by donble discing or harowing, before they bake and become hard.

Harrowing will leave enough small clods on the surface to prevent much blowing orsoil drifting.

The plasticity or stickiness of soils and the hardness that comes when not properly handled is dne to the gluey snbstance referred to above. When soil is wet at time of plowing the soil particles tend to form a compact mass which when dry furnishes a poor home for plants. At the bottom of the furrows oftentimes the soil is damp enough to puddle, this gives a plowsole which is very resistant to soil processes and often becomes impervions. One must guard against this by plowing the soil varions depths from year to year.

Fall plowing of loams, medinm loams, heavy loams means:

1. More moisture in the soils during the summer months.
2. More available nitrogen dnring the growing season.
3. A seed germination which means health and vitality the whole snmmer.
4. A fertility worth, to the farmer, many dollars in increased crop.
5. A mastery of the farm work program for the season which is gratifying.
6. An ease of workability dnring the summer season which is welcome to man and beast.
7. A soil aeration of soil sanitation welcomed by the soil bacteria organization.
8. A partial decomposition of the soil organic matter which contribntes enormously to good crop growth.
9. A control of weeds, plants and insect diseases.
10. A type of farm which makes one feel that farming is worth while, paves the way to a higher type of farm life; makes wife and children feel that the best place on earth is our own farm home.

Come Early Come Early

Poised Like Bird Against Mountains

Miss Lydia Fulcher, champion of the Calgary Swimming Club, has shown Lake Louise, its yellow, orange and white poppies, its distant, silent mountains and gay tourist throngs, how the swan dive should be done. She is a true mermaid of the Canadian West, schooled in the aquatic art in the Canadian government's great pool, the Cave and Basin, at Banff, where she has many times swum since her youngest days.

Miss Fulcher became a champion last year at the Banff Winter Carnival when swimmers dived into the Cave and Basin, filled with hot sulphur water from Sulpher Mountain, while the temperature outside through the open roof of the Bnsin was sinking below the zero mark. This fancy diver has also demonstrated her ability as a speed swimmer. The above photograph shows Miss Fulcher poised in mid-air in the most graceful of dives, with an excellent view of Mount Victoria in the distnnce—some six and one-half miles away. With the diver is shown also the glacier as well as the foreground in sharp detail despite the fact that the exposure was timed to the infinitesimal fraction of a second.

The new pool, situated at Lake Louise, is one of the most popular in the Canadian Pncific Rockies. It is nbont 90 feet in length and eight feet in depth nt the deepest point. There nre springboards at various heights to suit the expert or amateur diver, and the water is wnrm enough to attract those not wishing to venture into the cooler depths of Lake Louise itself.

Fall Plowing Pays Dividends

Plowing is a method of sanitation so far as the soil life is concerned. After working vigorously all summer, breaking up the plant accumulations, adjusting to the root developing systems, making good use of the water applied at intervals during the growing season; gradually but surely becoming buried in their own gaseous and poisonous by-products, the life of the soil breathes a sigh of relief when it feels the effects of the trampling of the horses over head and the drag of the iron machine through the roadways and water ways of the home town. The opening up of the soil, the letting in of air so that the sanitary processes may go on, makes our soil friends as appreciative as any human being when in the morning, after a night's sleep in a close bed room, the windows are raised and the purifying air rushes in.

This plowing problem is a very important one as will be recognised from the above paragraph. Ancient Roman farmers believed it the most important factor in crop production. Fertility was a factor with them as was also the selection of the proper soil for the crops in question; but the most important operation to them was the plowing and proper preparation of the land.

Cato, when the question of important operations in relation to crop production was put to him answered: "The first thing is plowing; the second thing is plowing; and the third manuring". He further stated that "Plowing the land means rendering the earth porous and friable, which tends to increase its productiveness."

Virgil said: "A soil to be fertile must above all things be light and friable, and this condition we seek to bring about by the operation of plowing."

Shall we plow in the fall or spring? This depends upon the kind of soil. If loams and clay loams predominate then plowing should be done in the fall. There is a tendancy to turn up soils in a cloudy condition in the fall, but the wetting and drying, and freezing and thawing processes during the winter will render the clods friable.

Each clod is held in that condition due to the equal distribution of gluey substances which when wet makes the soil sticky and when dry, cloddy. The wetting process redistributes the gluey material, so that there are many centres of concentration in the mass. As the water evaporates there is a competition set up between these centres for the water, this competition results in a development of lines of weakness or cracks in the clod; these cracks then become filled with water, the water freezes, expands then thaws and relaxes, this process repeated a number of times acts as a lever which breaks the clod apart. These processes during the winter are responsible for the mellowing of the clods so that in

Prince Opens Canadian Student Hotel in Paris

"Maison Canadienne" In Paris. (Inset) E. W. Beatty, K.C., President Canadian Pacific Railway.

The Prince of Wales formally opened the "Maison Canndienne" on October 1st, a part of the well known "Cite Universitaire" located on the outskirts of Paris. Canada is the first country, outside of the European continent, to erect a modern hostelry for the sole use of Canndinn students attending the "Cite Universitaire". When completed, this institution of learning will follow closely the lines of Oxford and Cambridge Universities. Aside from the central buildings wherein instruction will be given, there are to be various student residential halls or hotels. Each will be erected by various nations to house those of her students who are studying at the university. The "Maison Canadienne" is most modern and up to date, and has been built by public subscription, of which the sum of $250,000 was contributed by E. W. Bentty, President of the Canadian Pacific Railway.

The "Maison Canadienne" of which the facade is photographed above, is a stucco-finished building of pleasing exterior appearance and of very commodious interior. In addition to 45 well-furnished residential rooms, each with bathroom attached, there is a large public room or "Salle de Reunion", tastefully furnished after the latest accepted French design. The main corridor, which is done in similar design, at once impresses the visitor with the general spaciousness and solid comfort which is to be found throughout.

Silence! A TREMENDOUS PICTURE! Silence!

Cecil B. DeMille's

SILENCE!

The Picture of a Thousand Thrills
With an All-Star Cast

ALSO
